July 2010

Texas Instruments

Agenda

- High Brightness LEDs for Lighting
- TI Solutions for General LED Lighting
- TI Solutions for LED Backlight TV Power Supply

Agenda

- High Brightness LEDs for Lighting
- TI Solutions for General LED Lighting
- TI LED Solutions for Backlight TV Power Supply

The Challenges of Efficient Lighting

60 W

850 lm

1.000 h

10W

~ 700 lm

~ 50.000h

6W

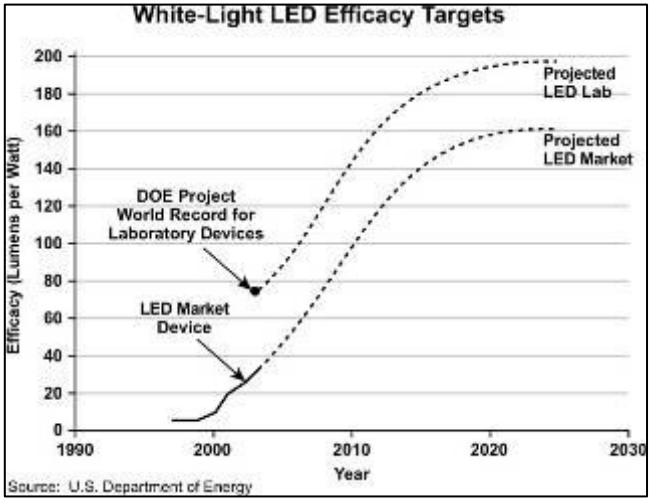
850 lm

50.000h

Engineering Challenges

- Cost
- Early Failures
- Color & Consistency
- Thermal Management
- EMI
- Dimming
- Timers
- Photo Sensors

Inspect every 6 mths

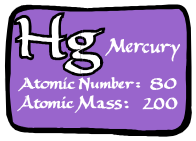


- White-light LED Efficacy just now approaching CFL's
- Driver CAGR 15% - Illumination CAGR >150%

LED Lighting Market Drivers

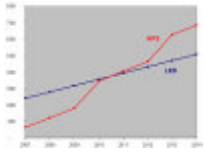
- The movement of the Green economy:
- High cost of energy

- Legislation is essentially banning incandescent lighting sources.
- Health and Environmental concerns



- Maintenance & reliability value proposition of LED lighting systems
- Total cost of ownership

- Performance Advancements of LED lighting systems



Lighting Technologies Comparison

Incandescent

- Very inexpensive
- Great color
- Very short lifetime
- Extremely inefficient

Fluorescent

- Inexpensive
- Efficient
- Contains mercury
- Difficult to dim/control
- Problems in cold temps

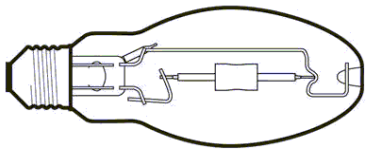
Compact Fluorescent

- Energy efficient
- Contains mercury
- High price vs. incand.
- Problems in cold temps

Halogen

- Great color
- Focused light
- Very short lifetime
- Inefficient

High Intensity Discharge



- Inexpensive
- Efficient
- Long start time
- Poor color

Light Emitting Diodes

- Energy Efficient
- Long Life
- Rugged
- No Heavy Metals
- Fast Start Time
- No UV/IR effects (in most cases)
- Directional Light
- Low Total Cost of Ownership
- Technology/Cost improvements
- Thermal Considerations
- Initial Fixture/Bulb Cost

Power Conversion – White Light Sources

Power Conversion for "White" Light Sources

	Incandescent† (60W)	Fluorescent† (Typical linear CW)	Metal Halide‡	LED*
Visible Light	8%	21%	27%	15-25% #
IR	73%	37%	17%	~ 0%
UV	0%	0%	19%	0%
Total Radiant Energy	81%	58%	63%	15-25%
Heat (Conduction + Convection)	19%	42%	37%	75-85%
Total	100%	100%	100%	100%

† IESNA Handbook ‡ Osram Sylvania

Source: US DOE - EERE

The conducted heat creates a heat removal problem not presented in traditional lighting technologies. This is typically achieved via metal heat sinks.

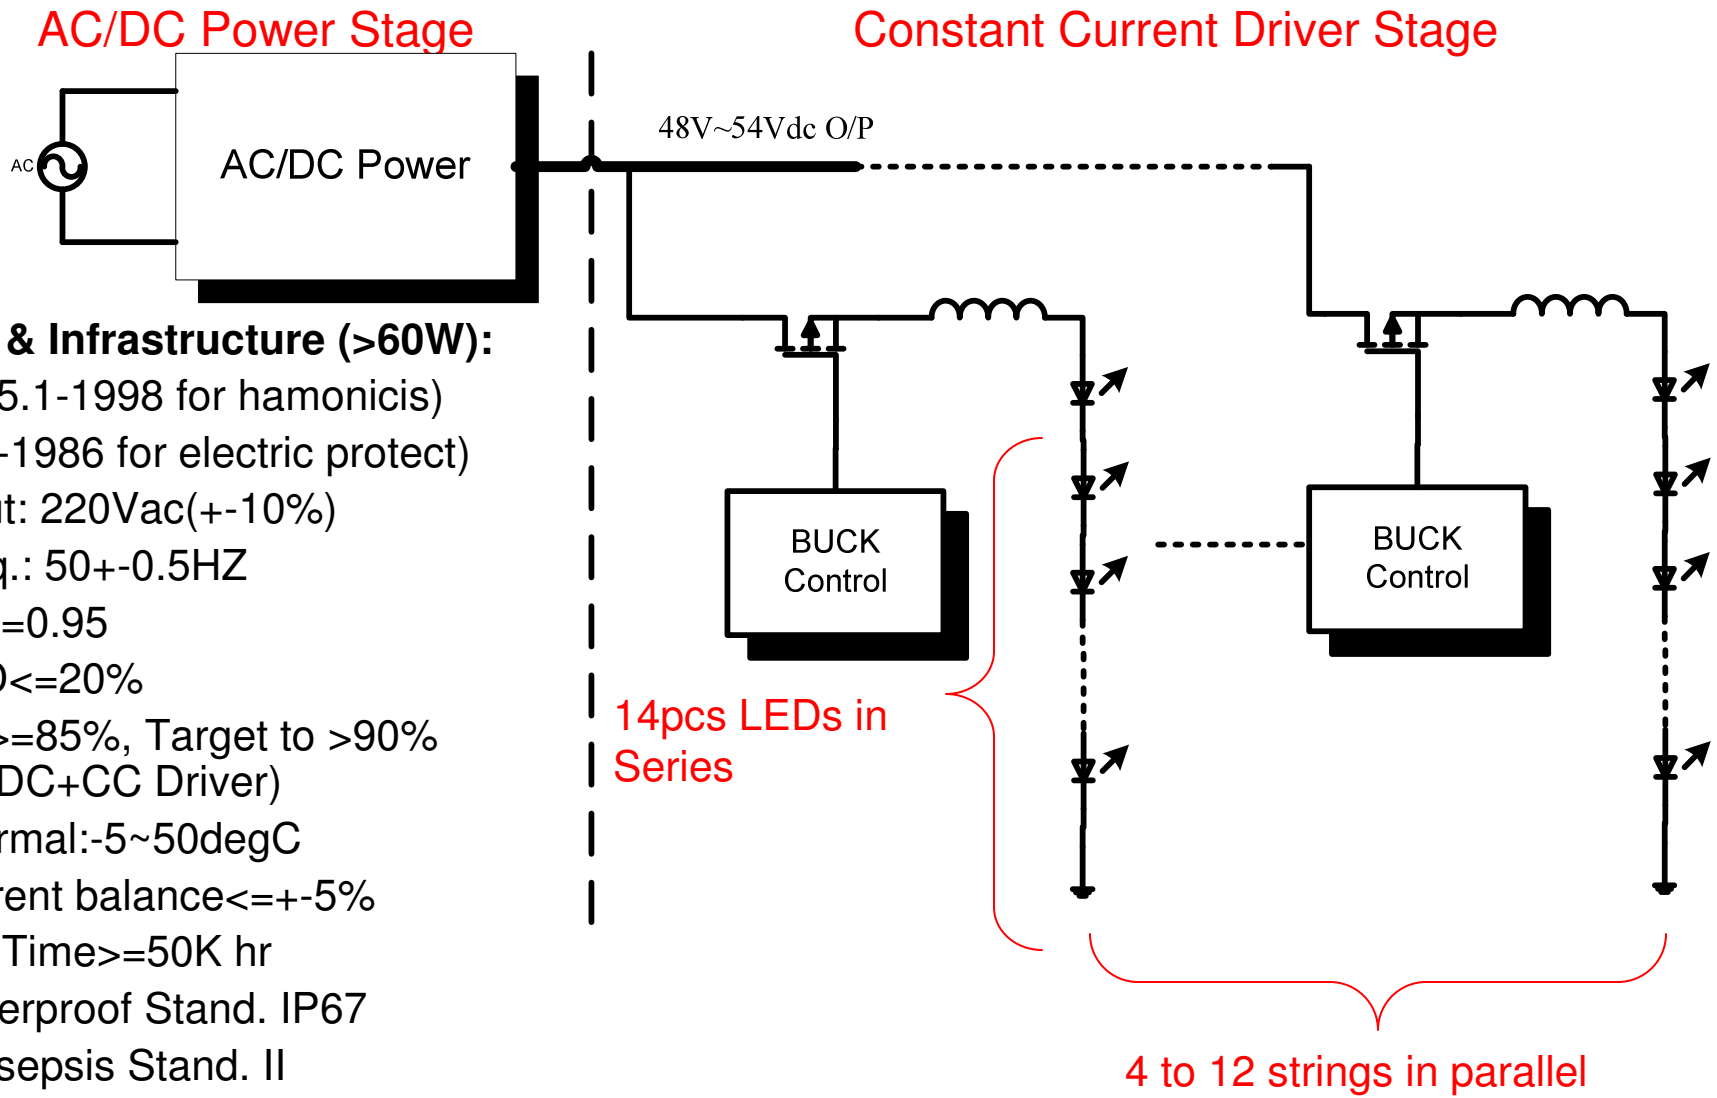
LED Lighting Topology in China



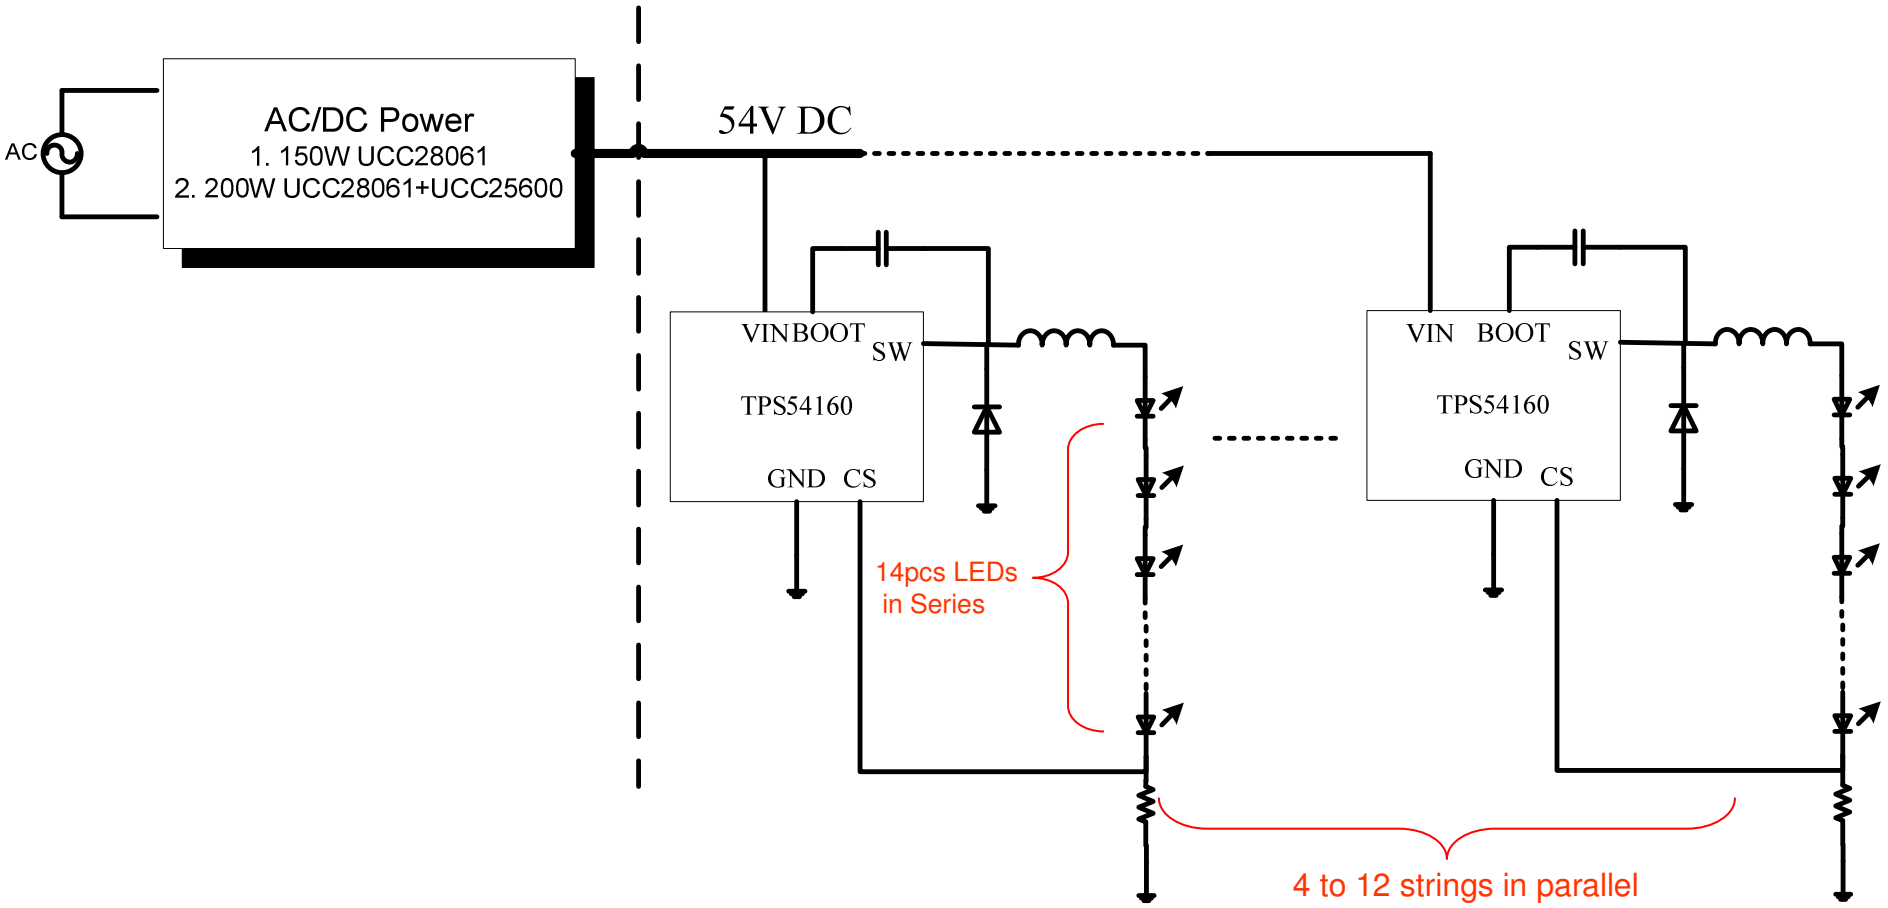
Outdoor & Infrastructure (>60W):

(GB17625.1-1998 for hamonicis)

(GB7001-1986 for electric protect)

- Input: 220Vac(+-10%)
- Freq.: 50+-0.5HZ
- PF>=0.95
- THD<=20%
- Eff.>=85%, Target to >90% (ACDC+CC Driver)
- Thermal:-5~50degC
- Current balance<=+-5%
- Life Time>=50K hr
- Waterproof Stand. IP67
- Antisepsis Stand. II

General Street LED Lighting Solution 1



TPS54160

3.5 to 60V Input 1.5A DC/DC Converter - SWIFT™

Features

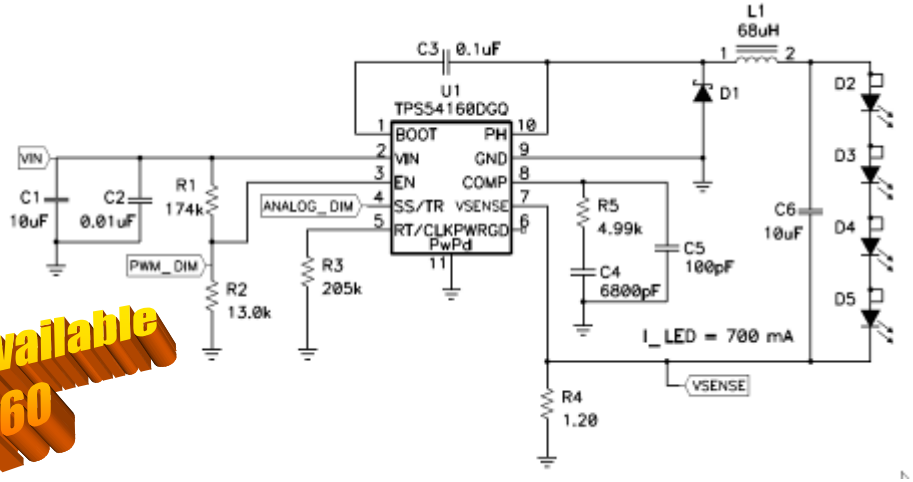
- Output Voltage Adjustable Down to 0.8V
- Integrated 200 mΩ High Side MOSFET
- Pulse Skipping Eco-Mode™ with 116uA Operating and 1.3uA Shutdown Current
- 300 kHz to 2.5 MHz Switching Frequency
- Synchronizes to External Clock
- Adjustable Slow Start Time
- PG, Enable, and Track Pin
- Adjustable UVLO
- Available in 10MSOP PowerPAD™ Package

Benefits

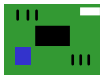
- Supports Low Output at 1% Initial Accuracy
- High Efficiency at Full 1.5-A Load Current
- High Efficiency under Light Load Conditions Extends Battery Life and Saves Energy
- Small Filter Size or Low Duty Cycle Support
- Eliminates Beat Noise
- Reduces Inrush Currents During Startup
- Easily Implement Sequencing Schemes
- Program Turn On Voltage Threshold
- Small Packaging Saves Space

Applications

- Aftermarket Automotive Accessories: Video, GPS, Entertainment
- 12V, 24V and 48V Industrial and Commercial Distributed Power Systems



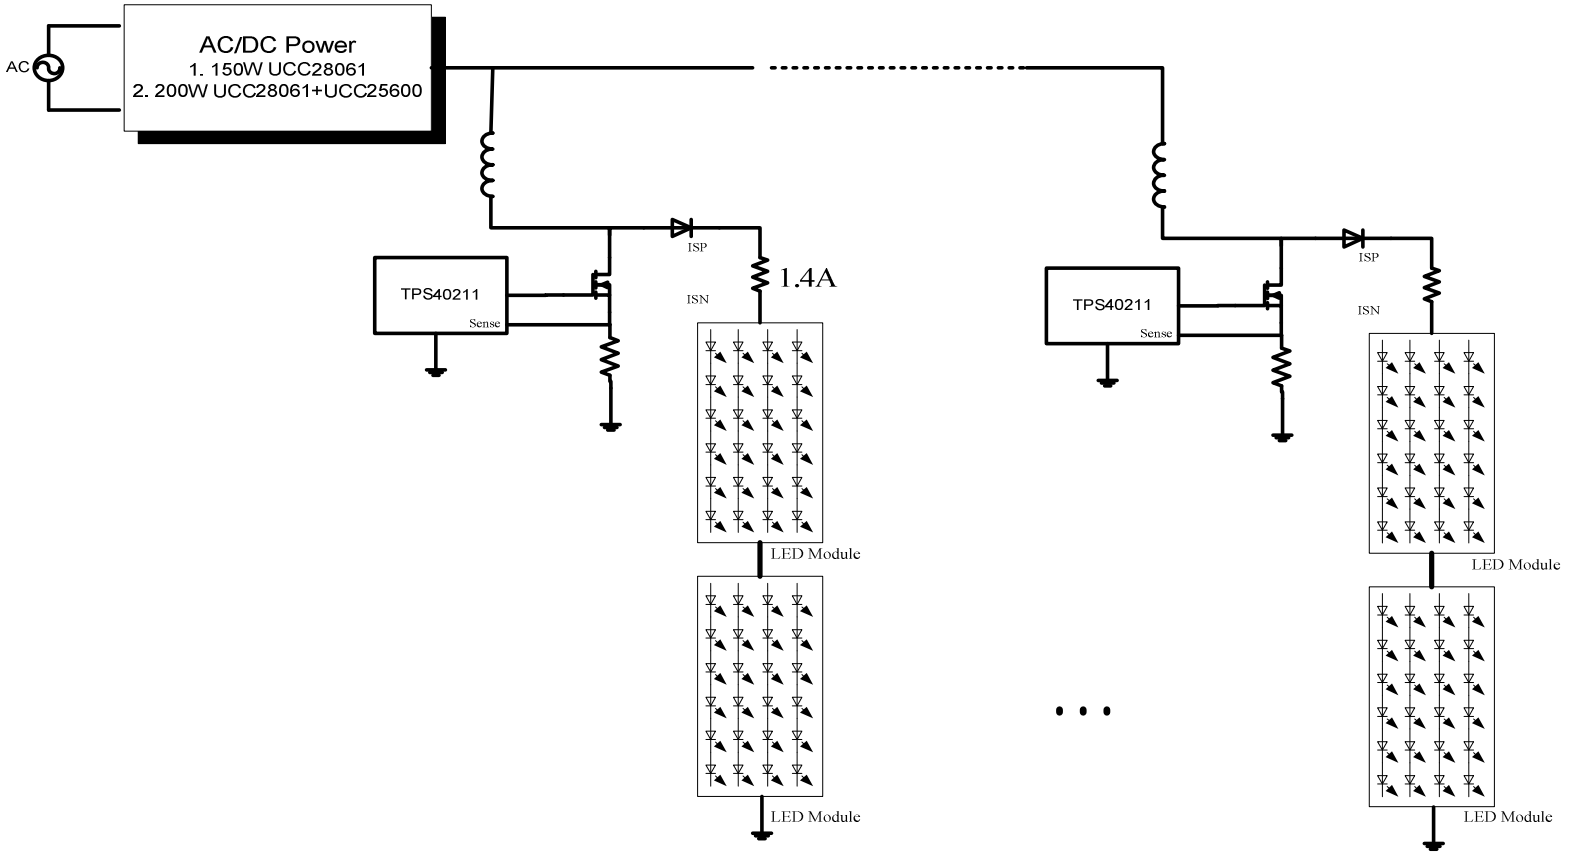
EVM/Tool



TPS54160EVM-535
Switcher-Pro Tool

2A Version Available
TPS54260

General Street LED Lighting Solution 2



TPS40211

Fixed-Frequency Current-Mode Controller for Boost, Flyback and SEPIC

Features

- Wide Input Operating Voltage: 4.5 V to 52 V
- Programmable Switching Frequency
  - 35k to 1MHz
- Frequency Synchronization
  - (requires external components)
- Closed Loop Soft Start
- 260mV Voltage Reference
- Internal Under-Voltage Lockout
  - 300mV Hysteresis
- Integrated Low Side Driver
- Programmable Over-current Protection

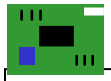
Benefits

- Allows designs up to 14 LEDs in series
- Flexible Filter Design
- Allow to syn. off a system clock
- Prevents inrush current
- Enables use of small I_{SENSE} resistors with lower power dissipation
- Design and implementation flexibility
- Fewer external components
- Protects the device upon string short

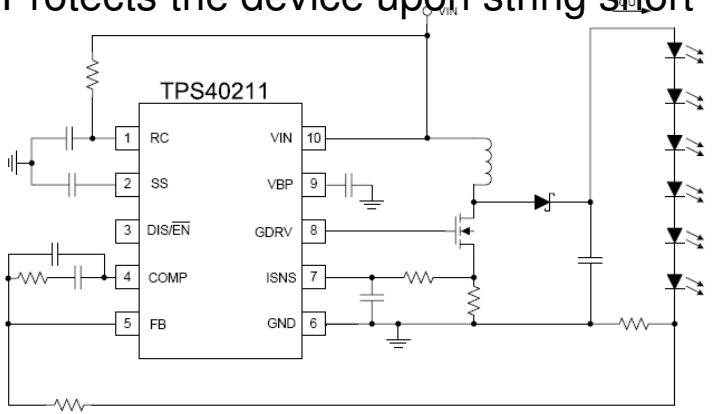
Applications

- High-Current LED Drivers
- LED Lighting Solutions
- LED Backlighting

EVM/Tool



TPS40211EVM-352

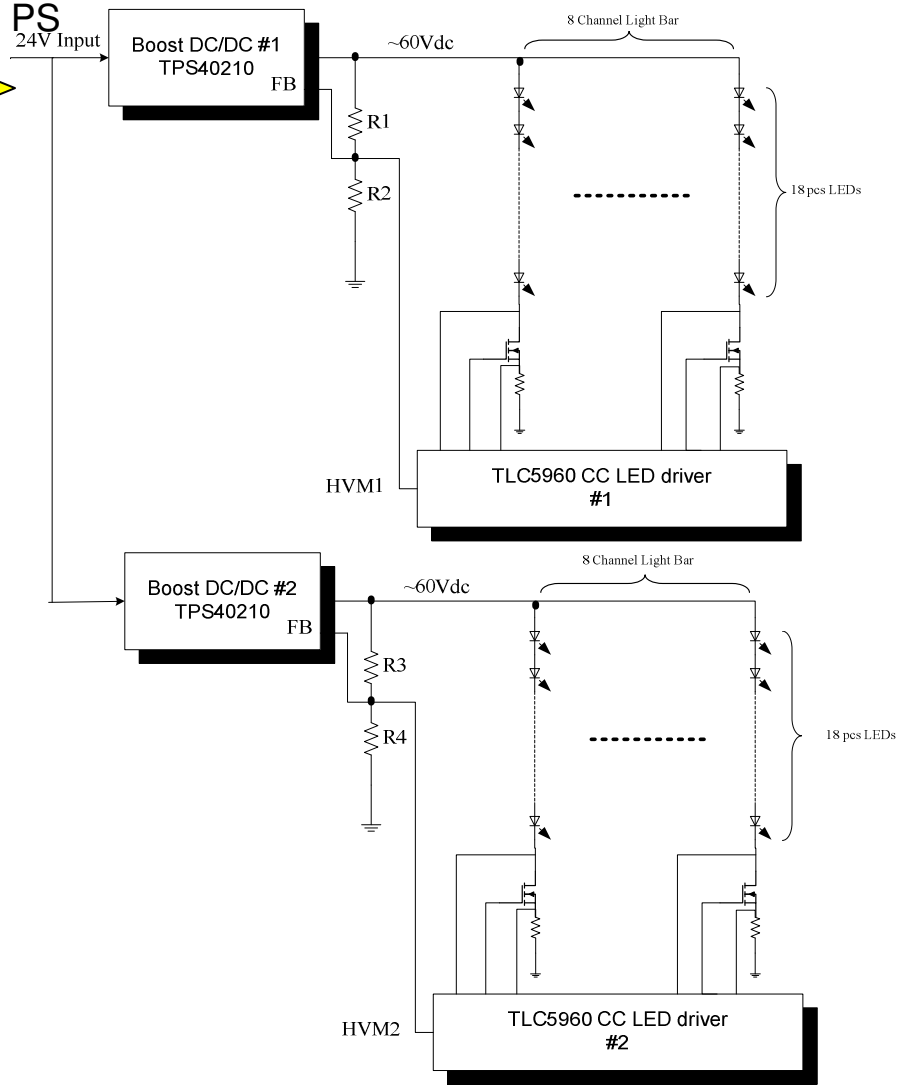


White LED Intelligent Linear Constant Current Driver

24V Input from Ultra-slim AC/DC PS

Detail Specification:

- Input: 24Vdc
- Power Output: LED strings: 16 channel x~60V with 18pcs 120mA LED per string
- PCB board specs 2 Layer PCB X-Y dimensions (max) - 10"x10" Height (max) - 10mm (not including PCB thickness)
- Dimming range- 1-100%
- LED current matching spec - <3% for full dimming range
- LED Protection (short, open, over current, under current, under voltage etc.)
- Operating temperature: 0degC ~ 50DegC and storage temperature: -20degC ~80DegC



TLC5960

8 Channel External FET Control

Features

- 8 Channel External FET Control
- 38V Abs. Max Voltage Sensing
- 24V Operating Voltage, 30V Abs. Max VIN
- Integrated LDO
- Integrated Under Voltage Lock Out (UVLO)
- Four Headroom Voltage Monitor Feedbacks (HVM)
- LED/FET Open Protection, FET Short Protection
- Thermal Shutdown Protection
- Min. 5uS resolution PWM gate control
- TLC5960/61 (PWM Control/ Serial Interface ON/OFF)
- 38 pin TSSOP Package

Applications

- LED Backlight
- LED Signage
- Architectural Lighting

Benefits

- 4 head room voltage monitor feedbacks, FET controller for lower power dissipation on board
- Robustness; Full system diagnosis capability: LED/FET Open and FET Short Detection

Features

- Single stage with high PF>0.95, THD<20%
- Low cost for LED lighting AC/DC stage
- No 450V bulk capacitor with high reliability and long life time
- Interleaved QR-Flyback with ripple cancellation
- Single chip solution and easy design
- High efficiency >90%
- Low inrush current
- Turn key Solutions

Applications

- Street & Roadway LED Lighting

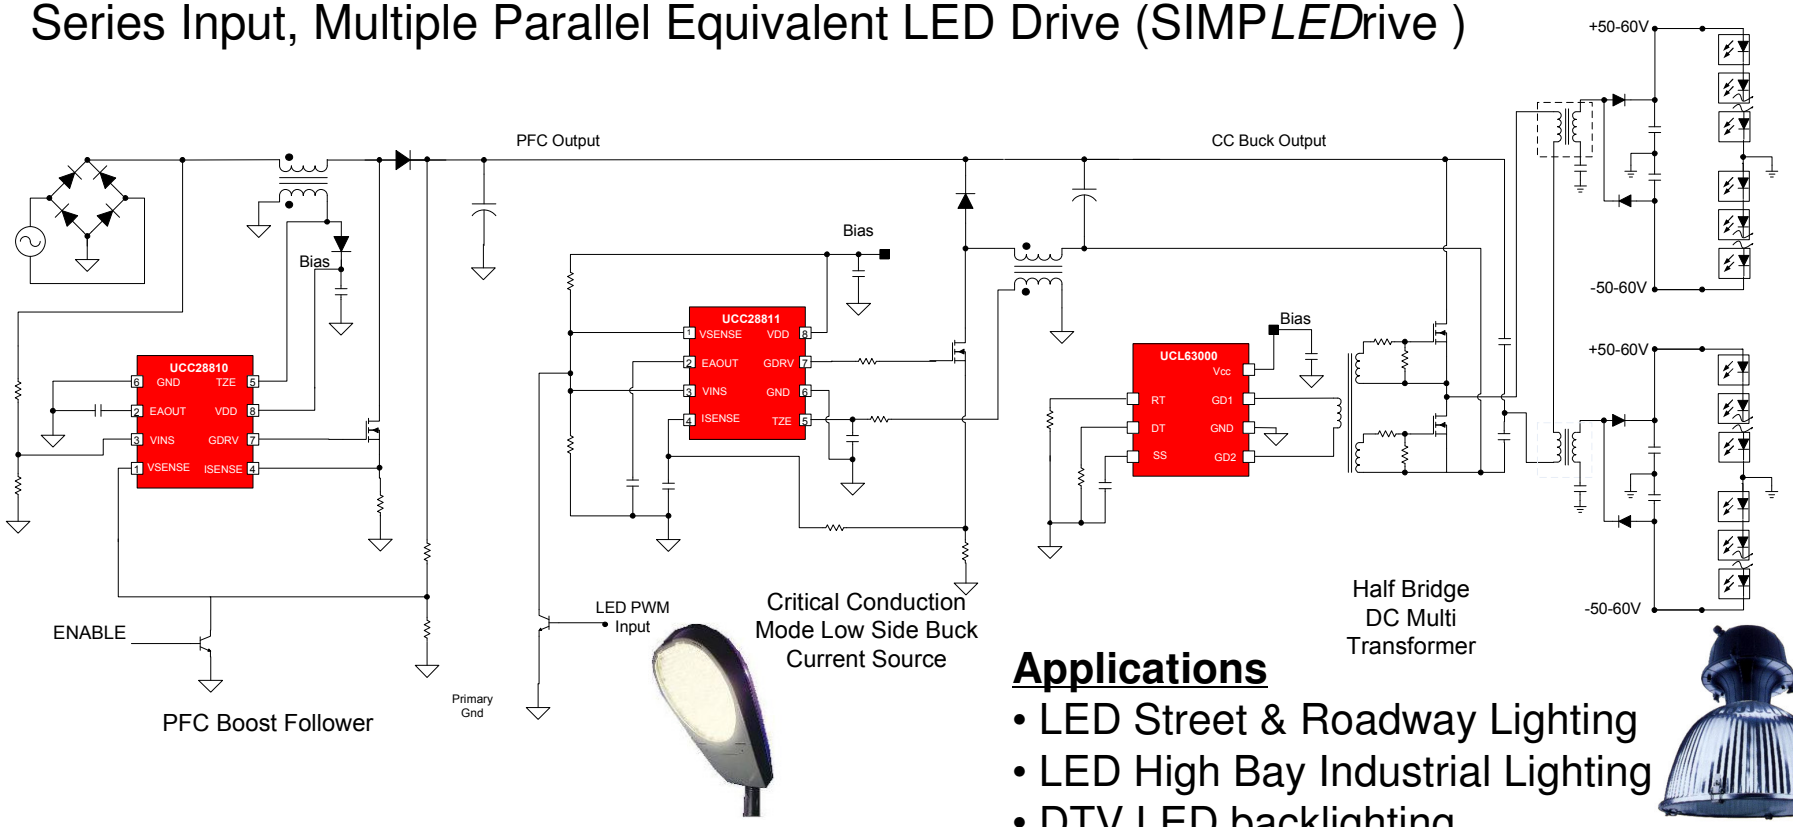
UCC28810 EVM003 - SIMP*LED*rive

Description	Parts	Vin (AC) Range	Vout (DC) Range	# of LEDs	Iout max.	Pout (max)	Eff.	PFC	ISO	Dimming In	Dimming Out	Contact	EVM
UCC28810 EVM003 100W Isolated Multi-string LED lighting driver w/ multiple tranformers	UCC28810 UCC28811 UCC25600	90 265	22 60V	4X (7-15)	500 mA	100W	91%	Y	Y	PWM	PWM	Jim Aliberti	Nov-09

Series Input, Multiple Parallel Equivalent LED Drive (SIMP*LED*rive)



Applications

- LED Street & Roadway Lighting
- LED High Bay Industrial Lighting
- DTV LED backlighting

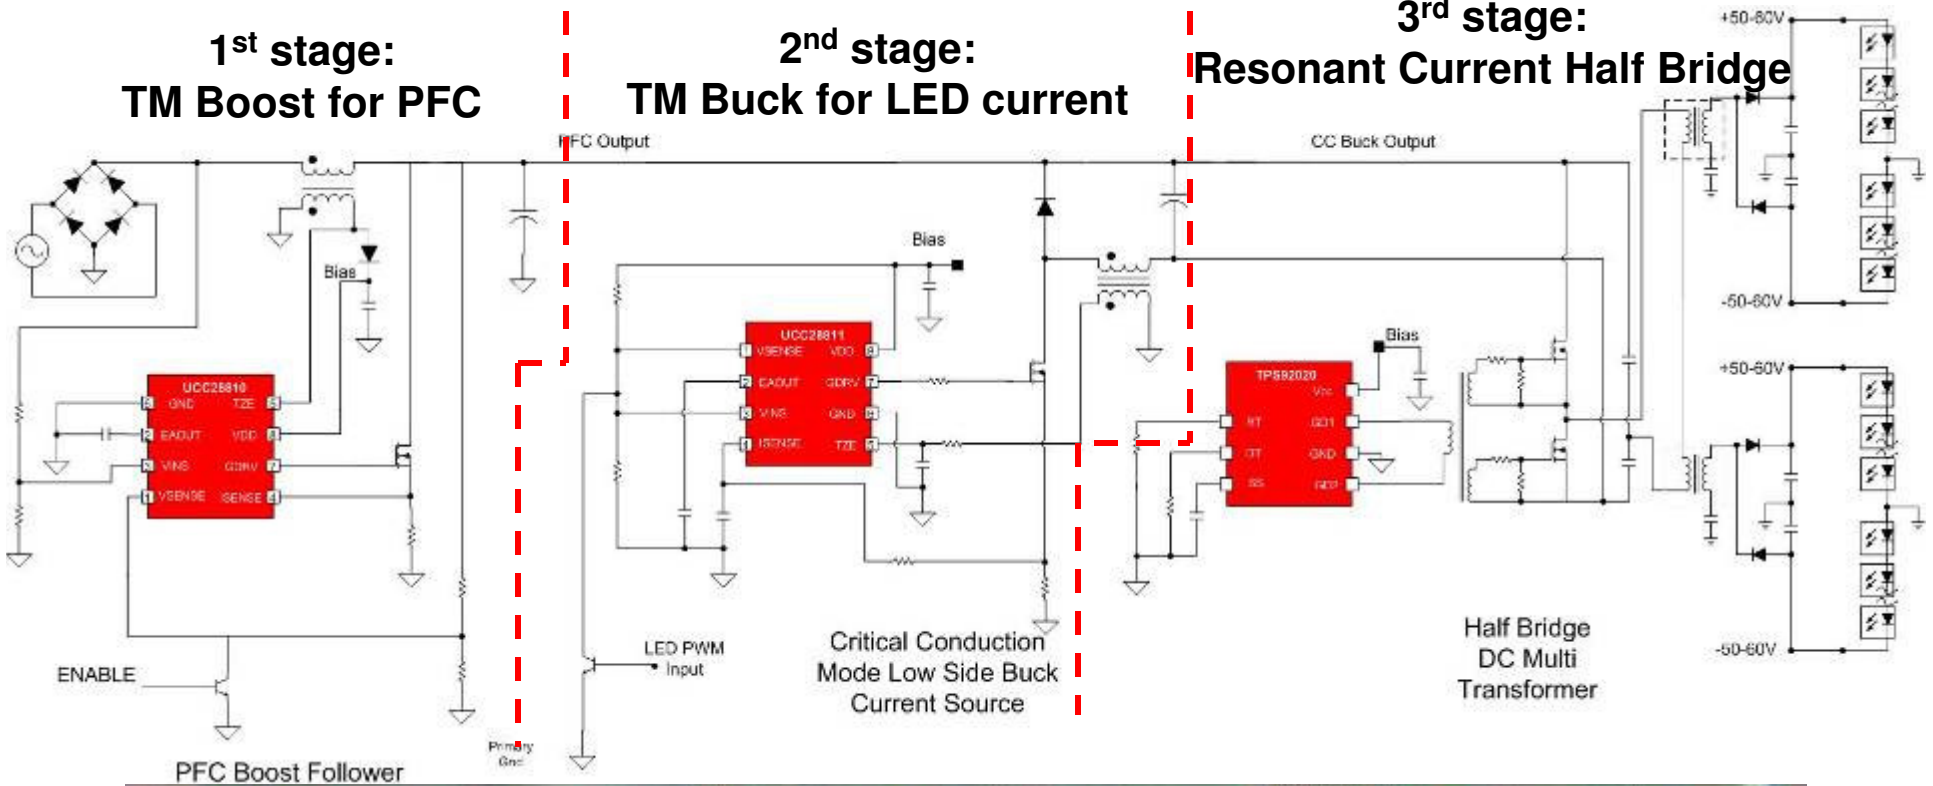
UCC28810EVM-003 - SIMP*LED*rive™

Series Input, Multiple Parallel Equivalent LED Drive (SIMP*LED*rive)

1st stage:
TM Boost for PFC

2nd stage:
TM Buck for LED current

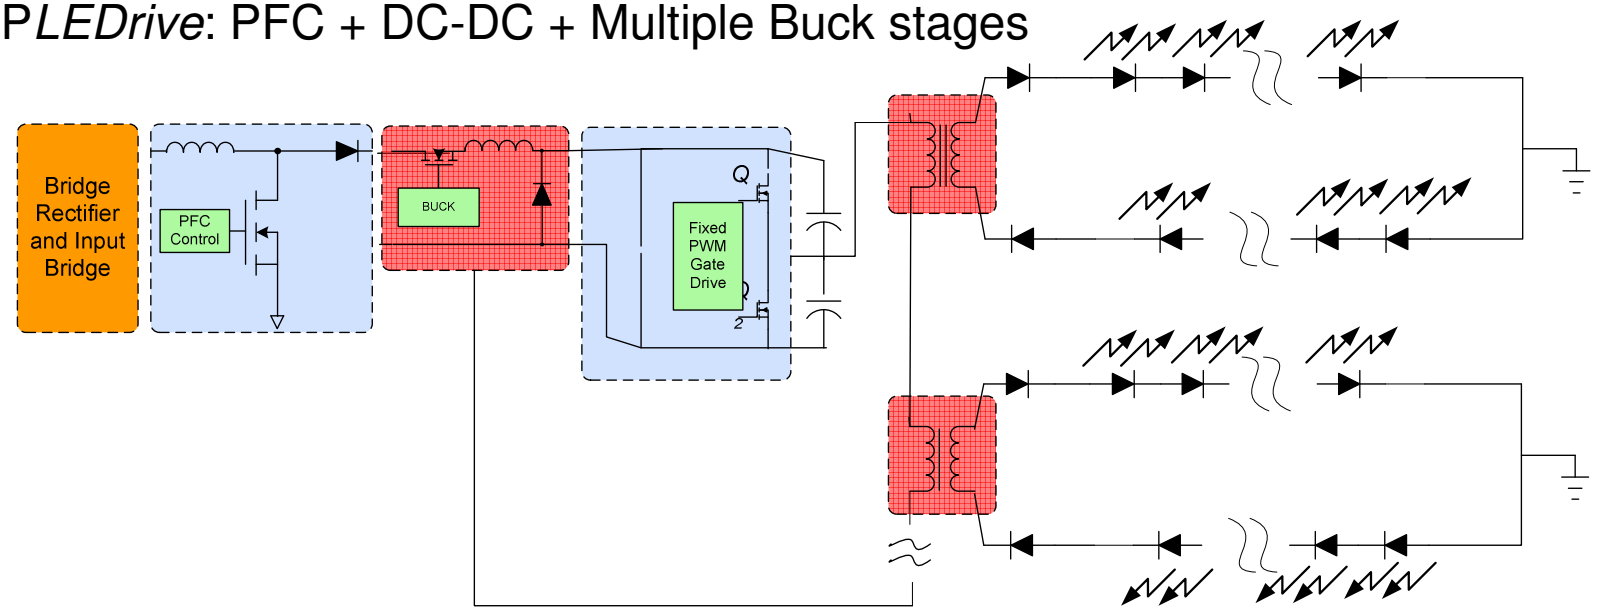
3rd stage:
Resonant Current Half Bridge



http://focus.ti.com/docs/toolsw/folders/print/ucc28810evm-003.html

High Light Output Drivers – PFC + Buck + Multiple

SIMP*LEDrive*: PFC + DC-DC + Multiple Buck stages



PFC Stage	- Required in any implementation
Low Side Buck	- Provides constant LED Current and main control
Series Transformers	- Provides constant current to each LED string

Benefit:

- One control section for all string currents,
- lower part count, higher reliability and lower cost

Drawback:

- All strings will be dimmed simultaneously (if individual dimming is required)

UCC28810EVM-003 Specification

Specification	Value	Unit
LED configuration	4 x 15	
Input Voltage	90 to 264	VAC
Efficiency	90	%
Power	100	W
Power Factor	0.97	
Output Voltage	54.5	VDC
Output Current	500	mA
LF Output Ripple	0	mVpp
Isolation	Yes

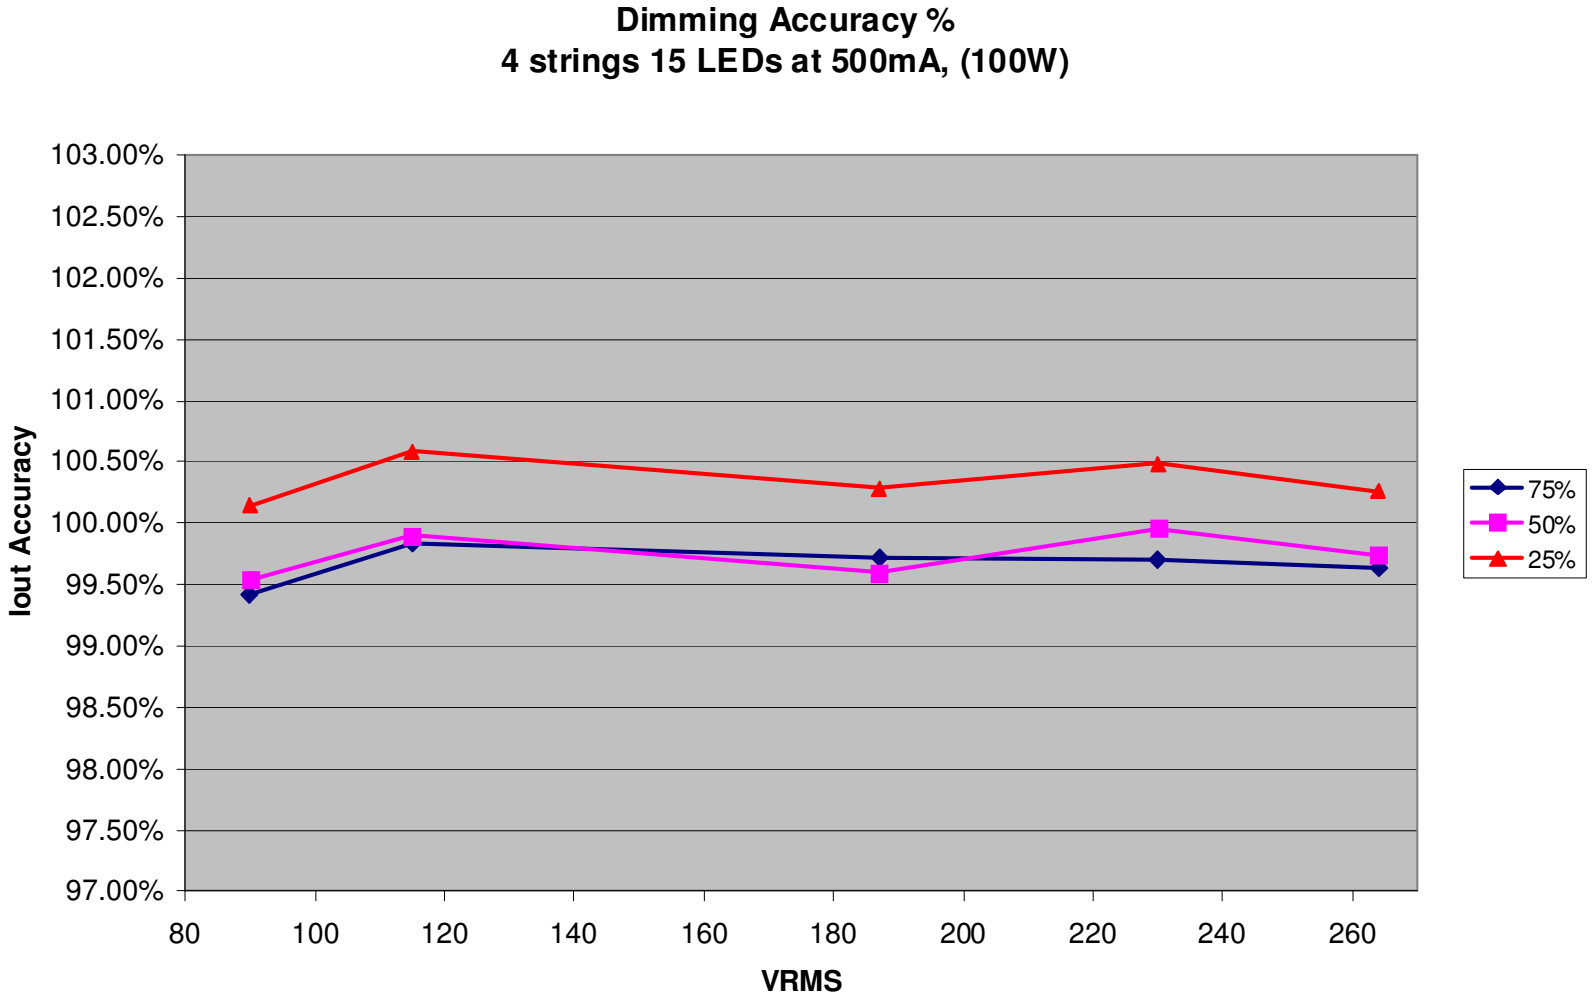
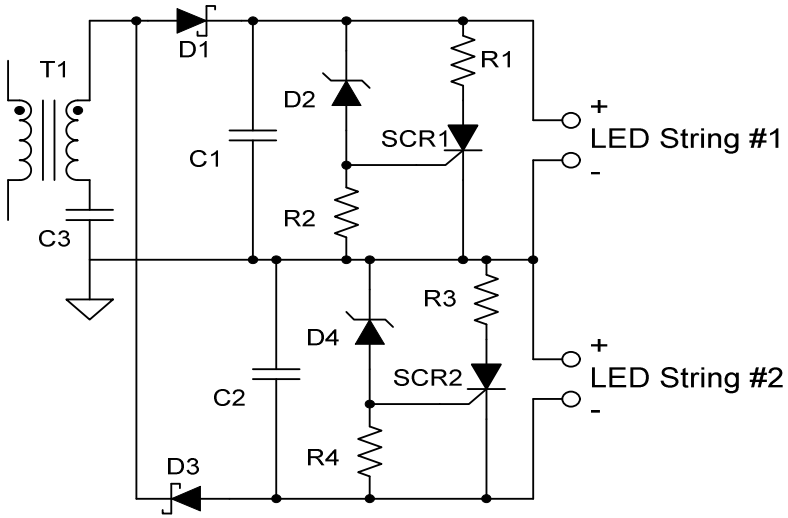
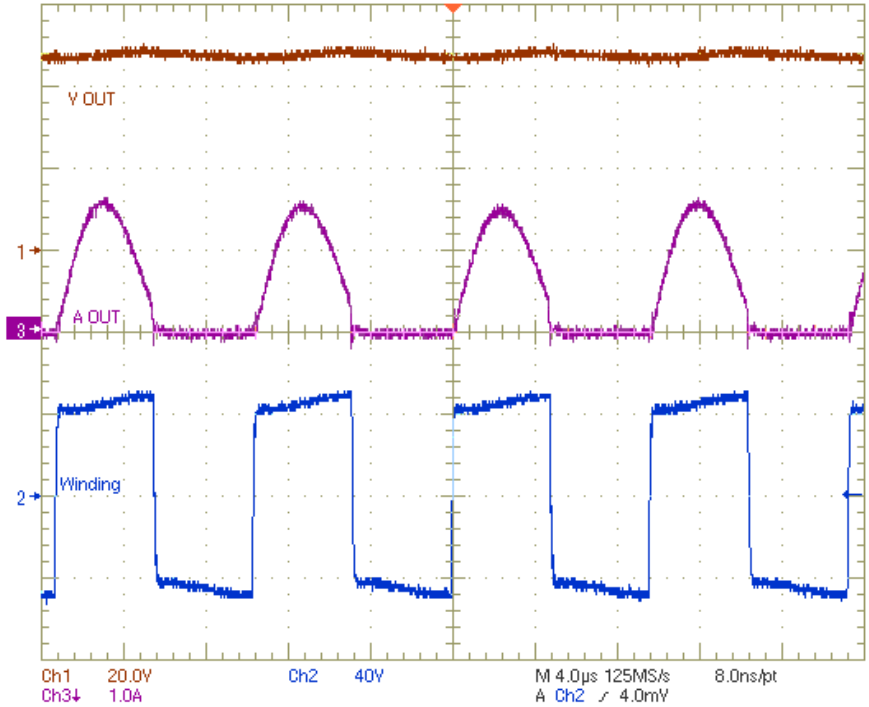
LED String Dimming Accuracy of SIMPLEDrive UCC28810 EVM003 Preliminary Test Results:



UCC28810EVM-003 Open String Protection

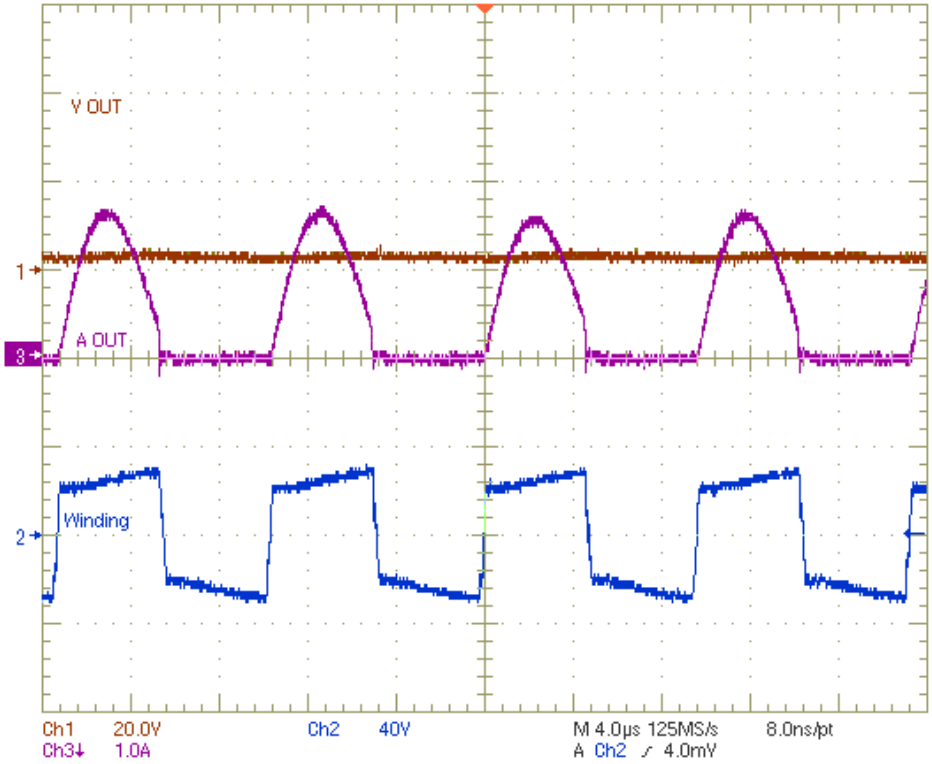
- If one string fails the other remain on.
- Each output incorporates a zener and SCR crowbar circuit
  - D2, SCR1, R1 and R2
- When string fails, zener voltage is exceeded and SCR latches on
- Transformer continues to deliver current to SCR and LED String #2





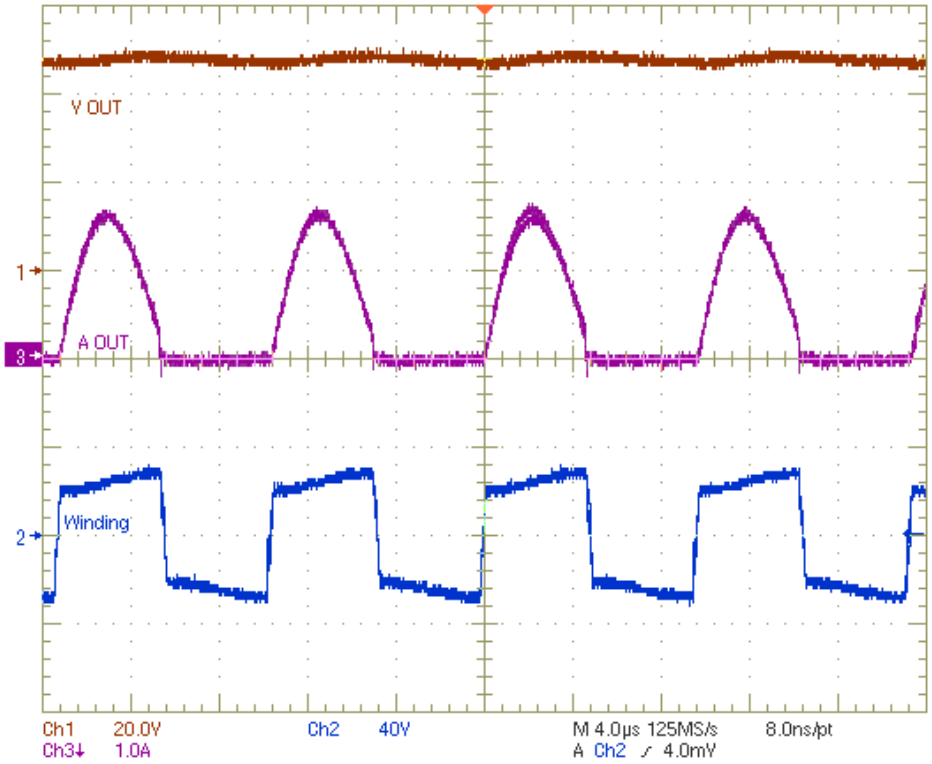
Waveforms During Normal Operation

UCC28810EVM-003 Open String Protection



LED String #1 Waveforms when Open Circuit

- VOUT and winding voltage clamped
- AOUT, transformer current continues to flow

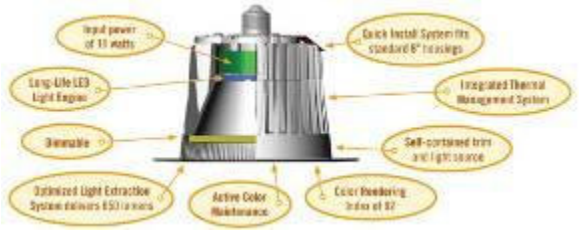


LED String #2 waveforms when LED String #1 is Open Circuit

- VOUT OK, winding voltage clamped
- AOUT, transformer current continues to flow

Residential Lighting LED Driver Solutions

- < 30W
- Low Cost
- TRIAC Dimming
- Power Factor Correction
- High Efficiency
- Color Quality
- Safety
- Long Life



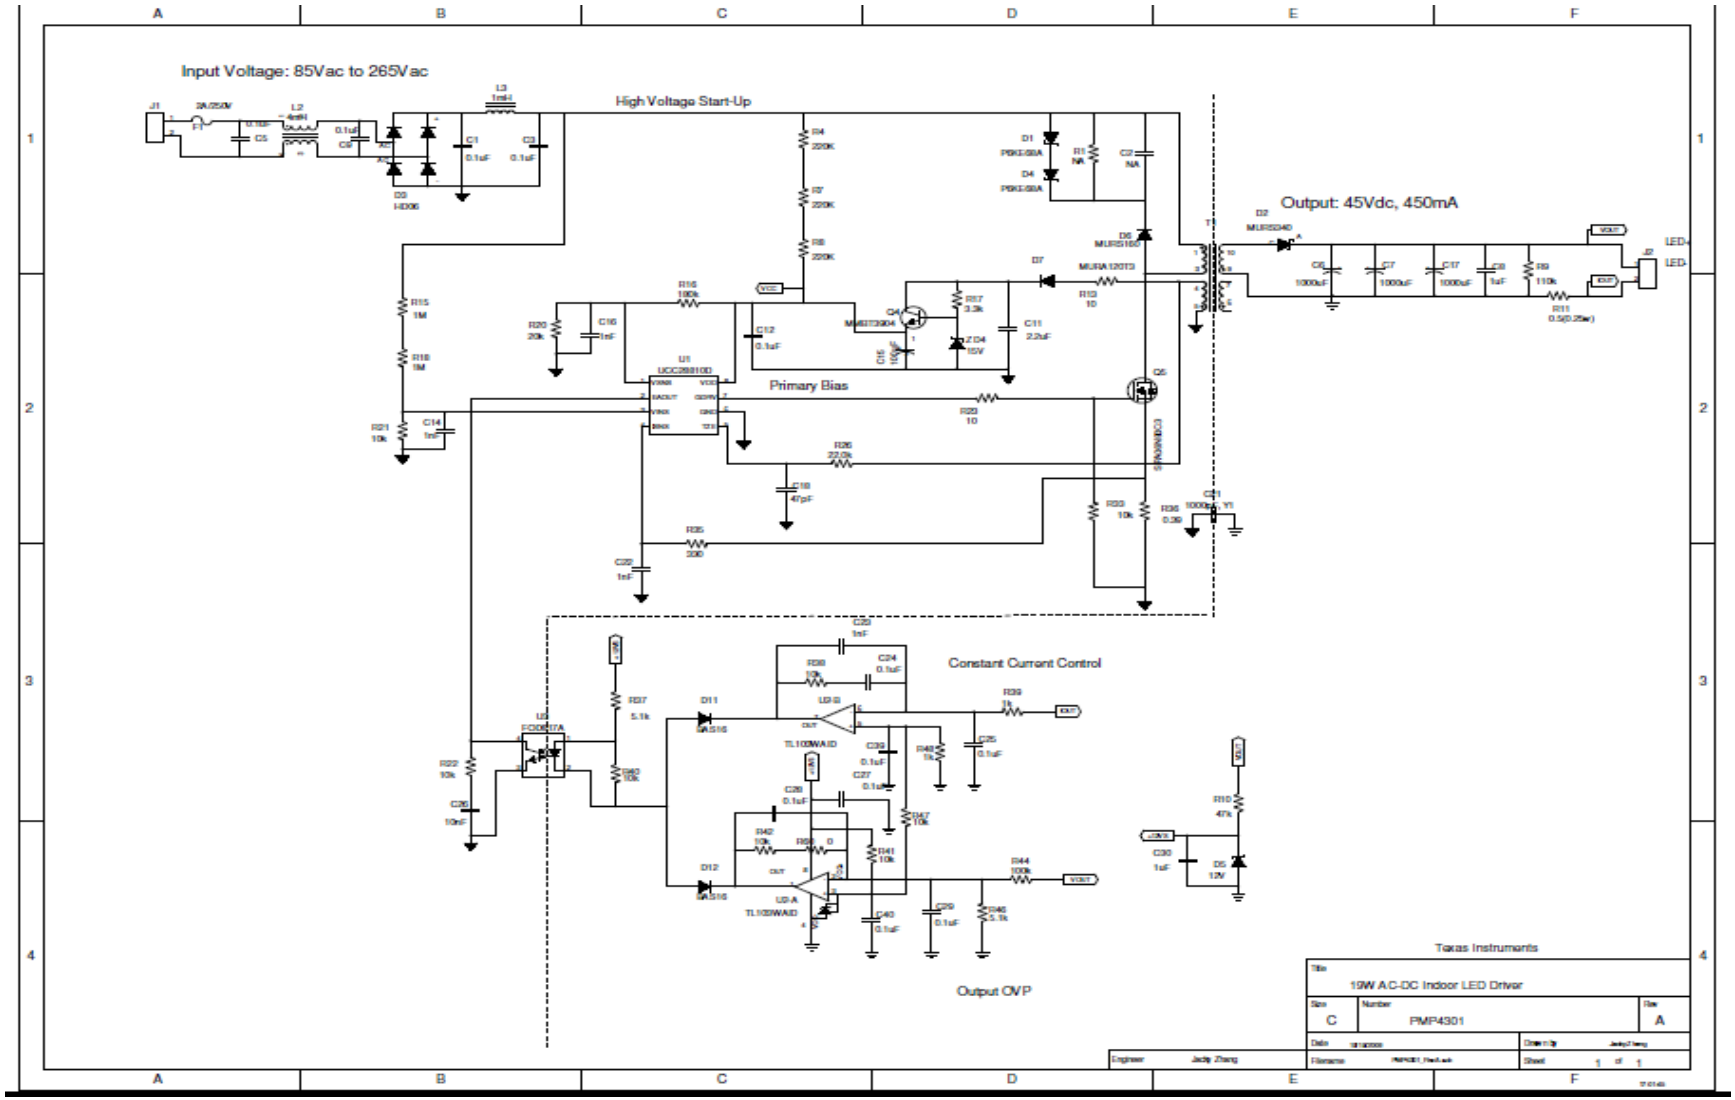
T10/T8 AC/DC LED Lighting Driver for Fluorescent Lamp

Reference Design	TI Parts	V_{in}	Po	Vo Io	Topology	Eff.	PF
AC Input T10 AC/DC LED Lighting Driver for fluorescent lamp	UCC28811	90-305 Vac	20W	30V~42V 450mA	Singe Stage high PF QR-Flyback	>85%	>0.95

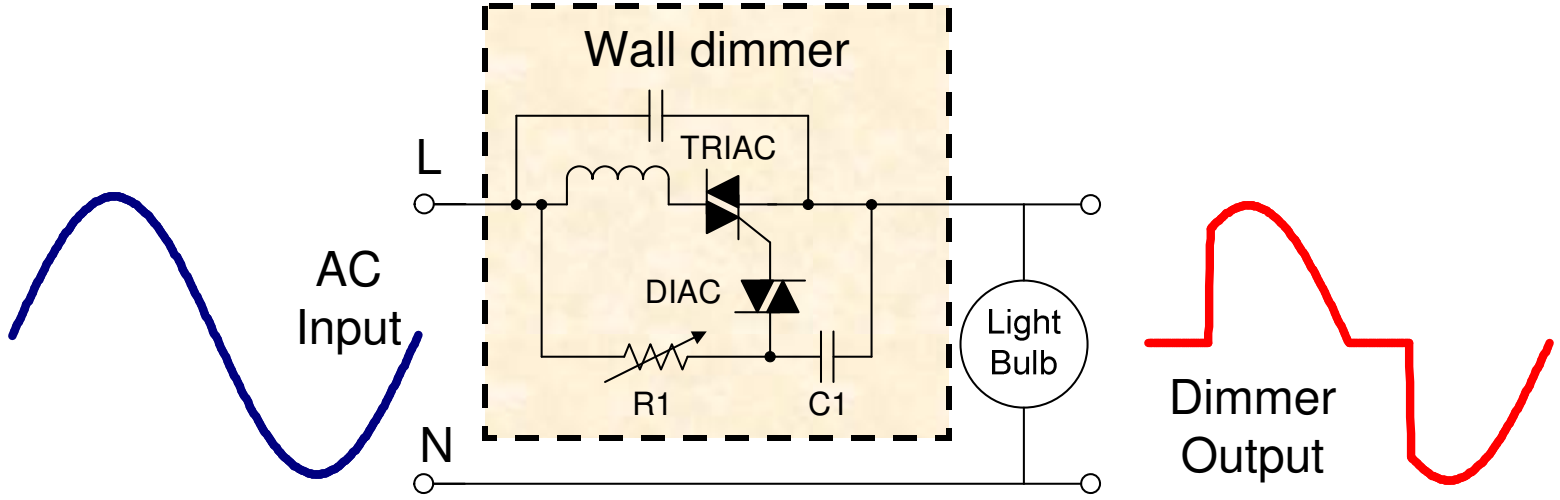
Features

- Efficiency >85% at 230Vac input
- Topology: isolated Flyback with power factor correction
- PF>90% at 230Vac input
- Size: 245mmX18mmx12mm
- Output over voltage protection: 45Vdc
- Output ripple current: <30% of output current

UCC28811 T8/T10 Schematics



The Trouble with TRIACs



- Start of AC cycle TRIAC initially off
  - C1 charges through R1 and light bulb
- When voltage on C1 exceeds DIAC threshold voltage the TRIAC conducts
  - R1 controls when TRIAC turns ON, dimming function
- Light bulb load must maintain TRIAC holding current
  - TRIAC turns off close to zero crossing and cycle repeats
- LED lights do not always consume enough power to keep TRIAC ON
  - Need to solve this with extra circuitry

Special care is required when making LED lighting compatible to standard TRIAC dimmers

TPS92210
Natural PFC LED lighting driver controller

Features

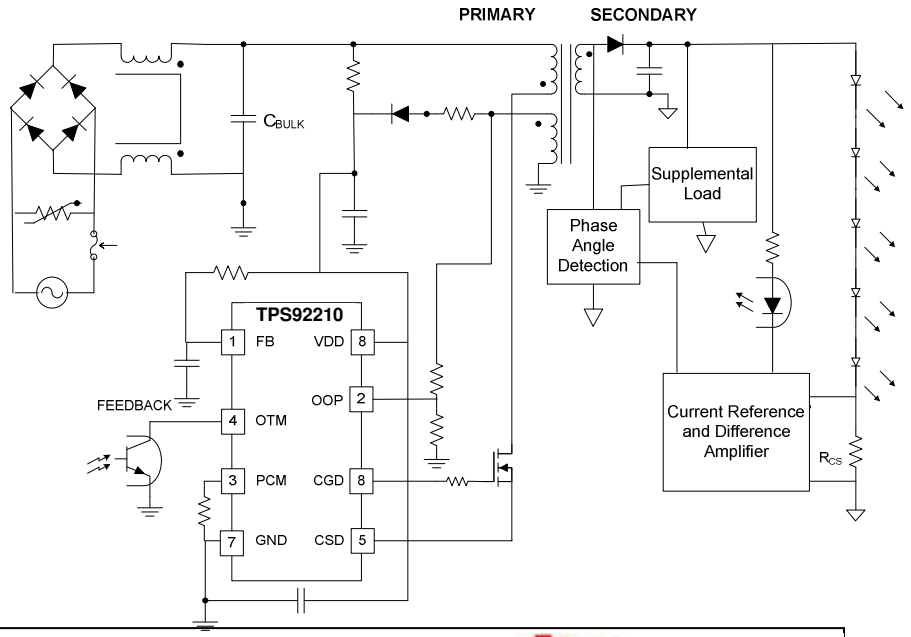
- Flexible Operation Modes: Peak Primary Current, Constant On-Time or both
- Cascoded MOSFET Configuration
- Works with TRIAC dimmers
- DCM or TM operation
- Advanced Overcurrent Protection

Applications

- Residential LED Lighting Drivers
  - A19 (E27/26, E14), PAR30/38, GU10
- Drivers for Wall Sconces, Pathway and Overhead Lighting
- Drivers for Wall Washing, Architectural and Display Lighting
- Commercial Troffers and Downlights

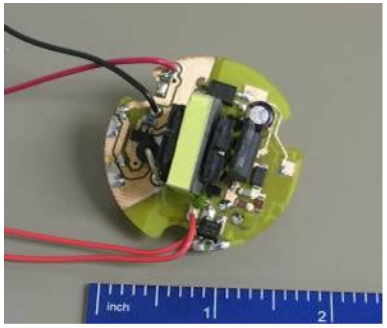
Benefits

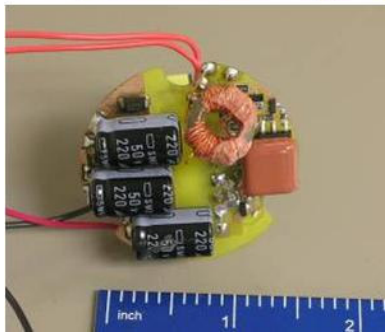
- Constant On-Time implements single stage PFC
- Fast and easy start up
- Line Surge Ruggedness better than Internal HV FET
- Continuous linear dimming
- Proven applications with TRIAC dimmers
- High Efficiency, low EMI
- No reverse recovery loss in output rectifier
- Smaller Size and Lower System Cost



12.5W AC/DC LED Lighting Driver w/ TRIAC dimming

Reference Design	TI Parts	V_{in}	Po	Vo Io	Topology	Eff.	PF
AC Input AC/DC LED Lighting Driver for fluorescent lamp	TPS92210	90-130Vac Or 210~240 VAC	12.5 W	38VV 350mA	Singe Stage high PF Flyback	>85%	>0.95





Features

- TRIAC dimming solution Compatible with standard TRIAC Dimmers - 0% to 100%
- High PFC with on time modulation
- Cascode drive for main switch

Applications

Residential LED Lighting Drivers

A19 (E27/26, E14),
PAR30/38, GU10

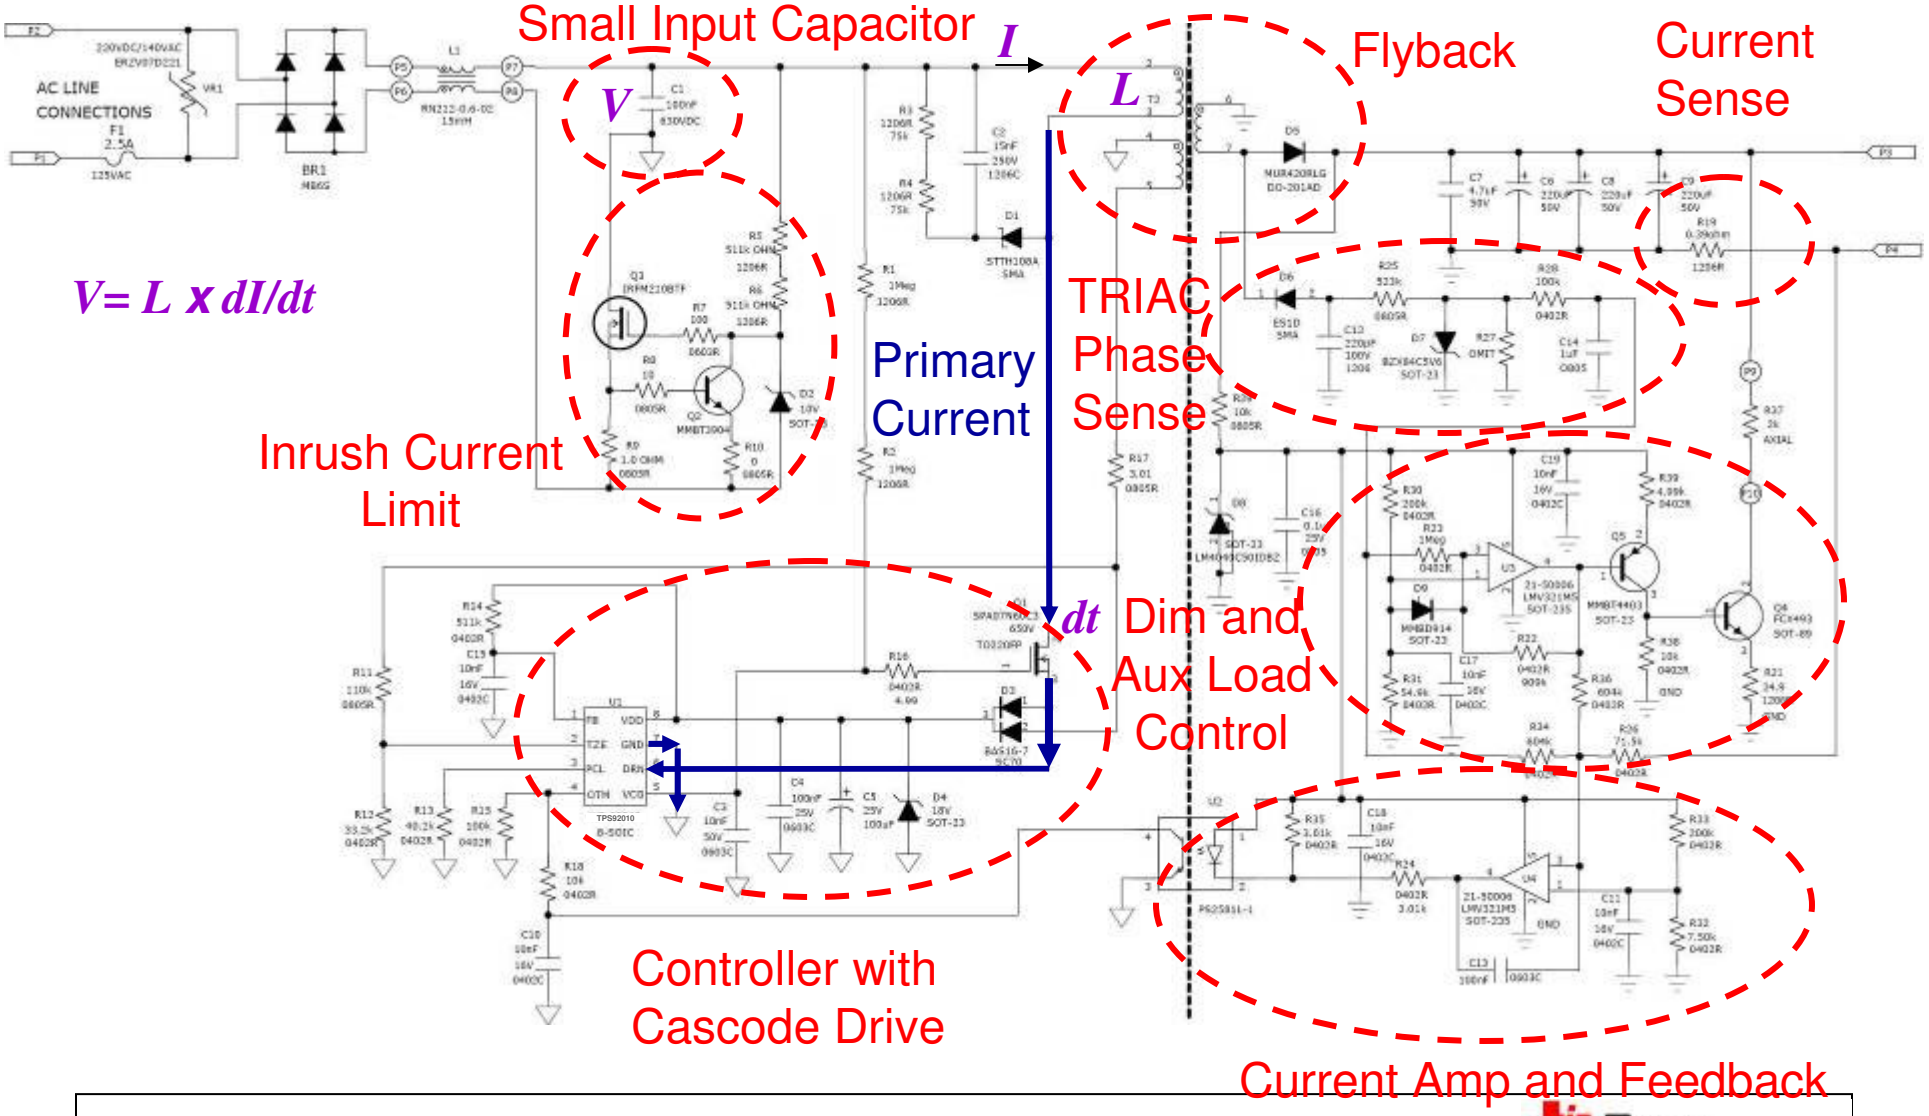
TPS92210EVM Specification

Specification	Value	Unit
LED configuration	9-11	
Input Voltage	90-130	VAC
Efficiency	85	%
Power	12.5	W
Power Factor	0.99	
Output Voltage	38	VDC
Output Current	350	mA
LF Output Ripple	300	mVpp
Isolation	2500	VAC

Specification	Value	Unit
Dimming Input	TRIAC	
Dimming Level	0-100	%
Current Sensing	Res	
Current Ref Accuracy	3	%
Temp. Range	-20 to 50	^{o}C
Lifetime*	35000	Hrs
Turn on time	150	mS
EMC Regulation	FCC B	
Safety Regulation		
Driver Dimensions	34 dia	mm

Note: *Lifetime assumes 35^{o}C internal temp. rise from ambient.

TPS92210EVM Schematic



TPS92010 8-Pin High Efficiency
Offline LED Lighting Controller

Features

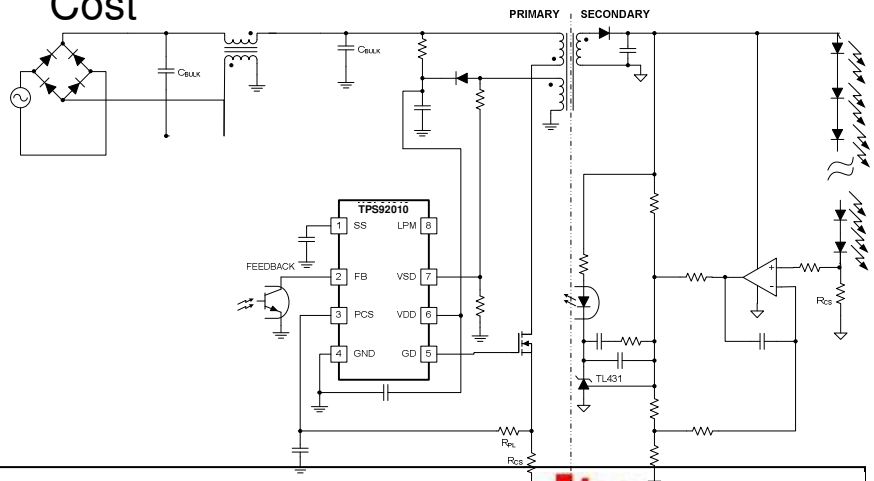
- High Efficiency LED Lighting Current
  - Quasi resonant and low power modes
- High Performance TRIAC Dimming with Application Circuit
- Programmable Overvoltage Protection
- Internal Over-temperature Protection
- Current Limit Protection
  - Cycle-by-Cycle Power Limit
  - Primary Side Overcurrent Hiccup Restart Mode
- TrueDrive Gate Drive 1A sink, 0.75A Source

Benefits

- 87% Achievable Efficiency – Higher than Standard Flyback Topologies
- Less than 400mW Standby Current Allows Efficient Deep Dimming
- 20% More Efficient Dimming compared with Other Methods
- Safely Shuts Down Driver if Open or Over Temperature Condition is present
- Protects Driver from Abnormal Conditions
- Lower Switching Losses Reducing System Cost

Applications

- Residential LED Lighting Drivers
  - A19 (E27/26, E14), PAR30/38, GU10
- Drivers for Wall Sconces, Pathway and Overhead Lighting
- Drivers for Wall Washing, Architectural and Display Lighting



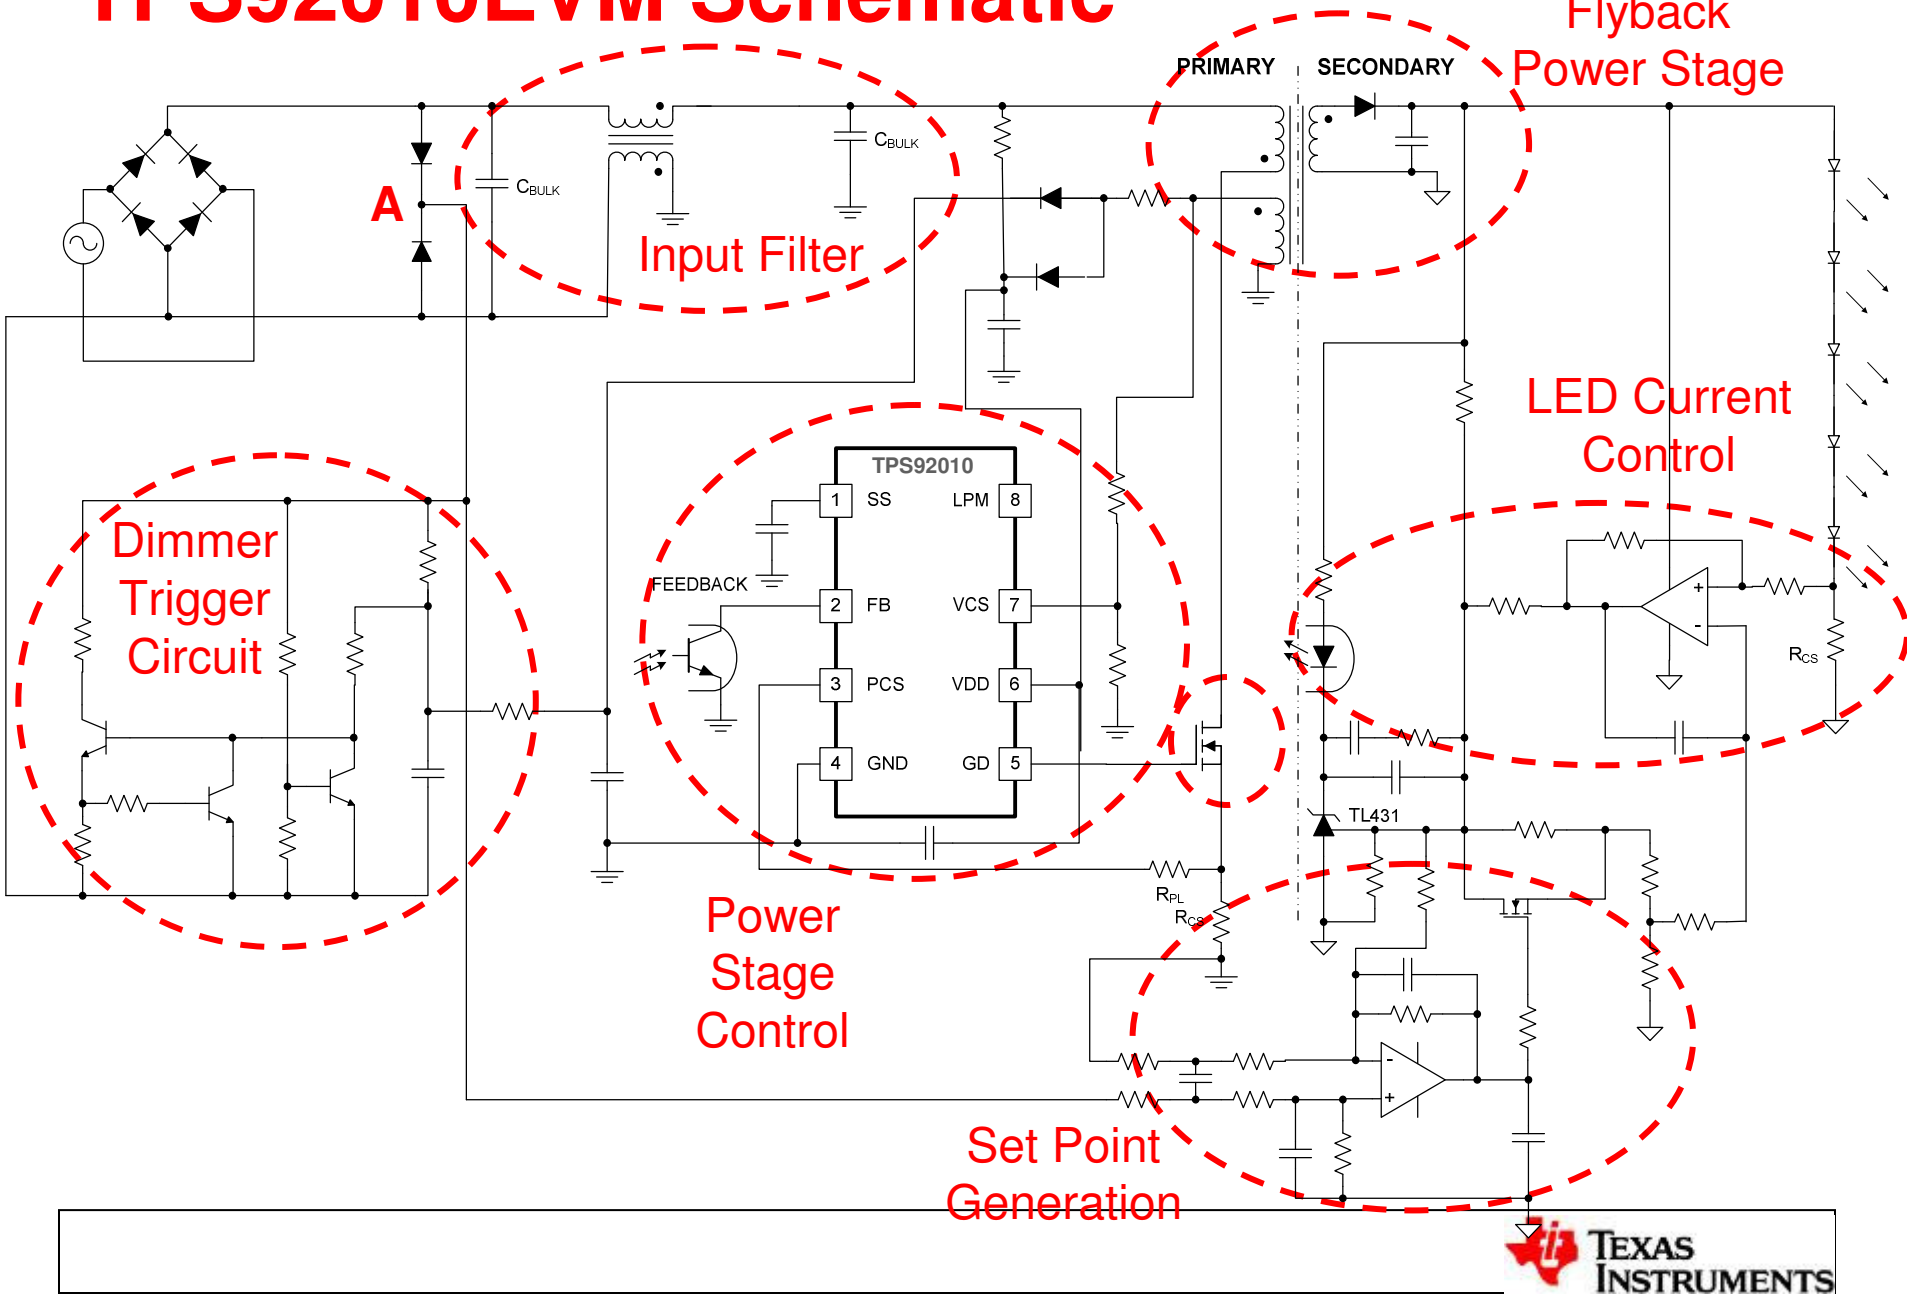
TPS92010EVM Specification

Specification	Value	Unit
LED configuration	3-5 Ser.	
Input Voltage	100 - 130	VAC
Efficiency	80	%
Power	7	W
Power Factor	0.55	
Output Voltage	9 - 18	VDC
Output Current	325	mA
LF Output Ripple	0	mVpp
Isolation	Yes	

Specification	Value	Unit
Dimming Input	Triac	
Dimming Level	0-100	%
Current Sensing	Res.	
Current Ref Accuracy	3	%
Temp. Range	-20 to 50	°C
Lifetime*	35000	Hrs
Turn on time	150	mS
EMC Regulation	FCC B	
Safety Regulation	No	
Driver Dimensions	60 X 20	mm

Note: *Lifetime assumes 35°C internal temp. rise from ambient.

TPS92010EVM Schematic

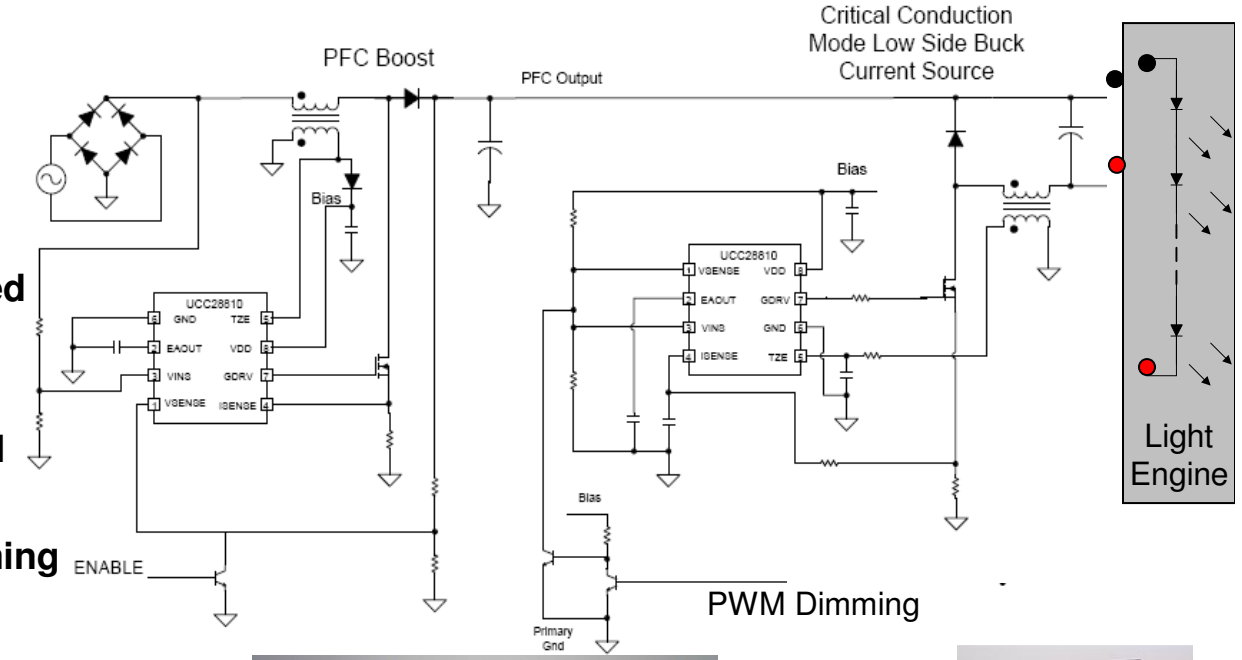


High Efficiency LED Street Light
UCC28810-EVM002 Reference Design

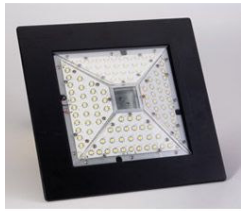
Description	Parts	Vin (AC) Range	Vout (DC) Range	# of LEDs	Iout max.	Pout (max)	Efficiency	PFC	ISO	Dimming In	Dimming Out	Contact	EVM
UCC28810 EVM002 100W LED lighting Driver	UCC28810 UCC28811	90 265	55 100	15-30	900 mA	100W	93%	Y	N	PWM	PWM	Jim Aliberti	Yes

Key Benefits:

- **Active Power Factor 0.99**
- **High efficiency > 94%**
- **Extremely robust**,
  - **the LEDs are well protected**
- **Extremely simple to use**:
  - **TM Buck inherently stable**
  - **no compensation required**
- **Fast LED Current Response**
  - **well suited for PWM Dimming**
- **Universal Range Input voltage**
- **High Reliability, long life**
- **Design tool to calculate key parameters for changes in LED Current, # of LEDs or Vin**



UCC28810 EVM002



Agenda

- High Brightness LEDs for Lighting
- TI Solutions for General LED Lighting
- TI Solutions for LED Backlight TV Power Supply

LED Backlight Solution for Large Panel TV

LCD TV (Direct Backlight)

RGB LED

- Piccolo F2802x/3x + DRV9812

White LED

- TPS40210+TLC5940/1

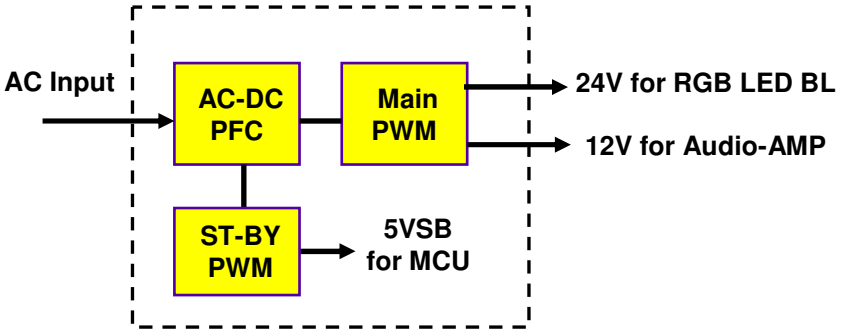
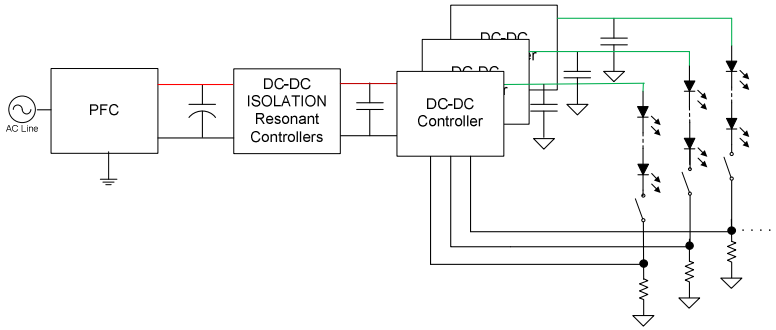
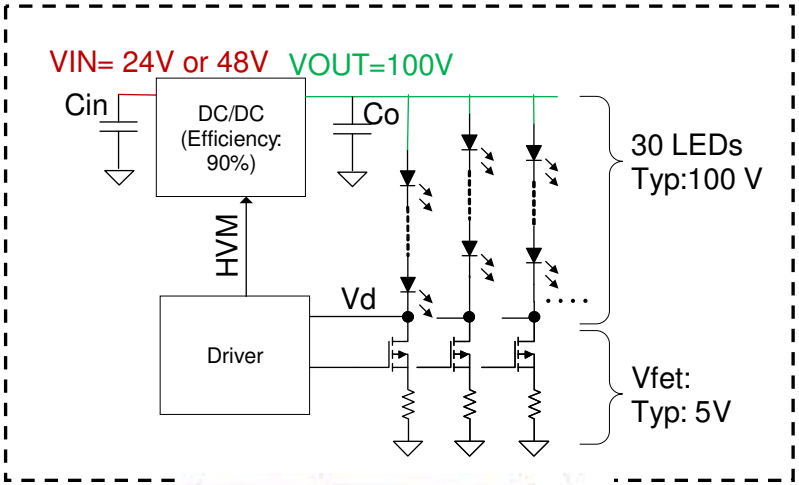
AC/DC Power Board





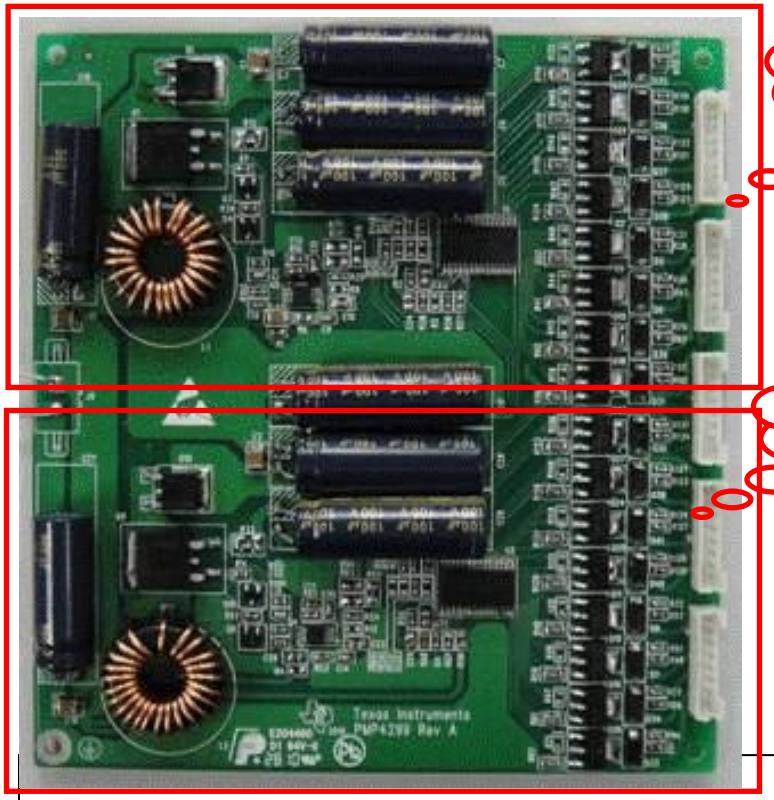
LED Driver for Backlighting



Solution	Size	Major Advantages	Interface	Status
TLC5960/61	32”~60”	8 Channel External FET Control, LED/FET Open Protection, Four Headroom Voltage Monitor Feedbacks (HVM) TLC5960/61 (PWM Control/ Serial Interface ON/OFF)	PWM/ Serial Interface	Aug 2010 MP
TPS40210	32”~60”	4.5V~52Vin DC/DC Boost Controller, Programmable Fsw (35K to 1MHz		Production

White LED Backlight TV Constant Current Driver

Reference Design	Designer	TI Parts	V_{in}	Output	Topology	Eff.	Dimming
PMP4299: **White LED Backlight TV Constant Current Driver**	Jacky Zhang	TPS40210 TLC5960	24Vdc	16 channel ~60V output with 120mA per string	DC/DC Boost+ Intelligent switching linear regulator	>91 %	PWM or Analog



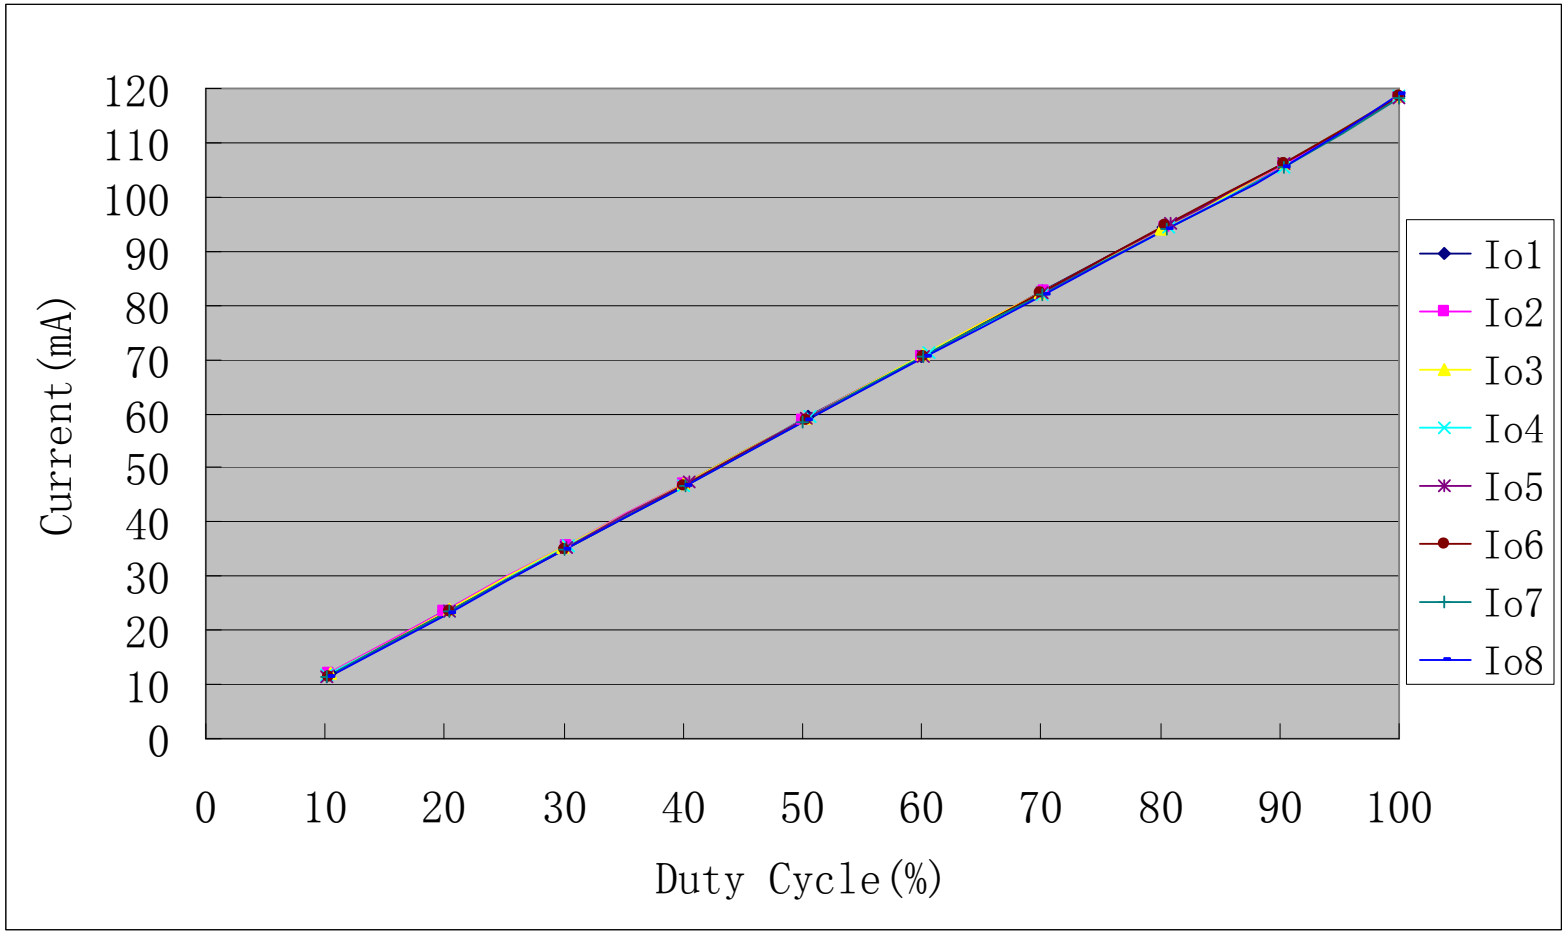
Features

- Intelligent Headroom Voltage Monitor (HVM) Feedbacks to improve efficiency;
- 8 Channel External FET Control with easy PWM dimming or analog dimming
- Fast PWM dimming response
- LED/FET Open Protection, FET Short Protection

Applications

- Edge type white LED backlight TV
- General LED lighting

White LED Backlight TV Constant Current Driver_ Current matching with 1%~100%PWM dimming



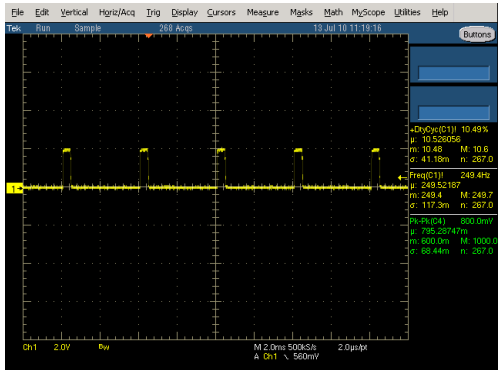
Vin=24Vdc, PWM dimming frequency=240Hz
PWM dimming frequency from 10%~100%

White LED Backlight TV Constant Current Driver_ Current matching with 10% PWM dimming

TPS40210 output voltage

HVM optimize LED driver input voltage

TLC5960 Enable signal



TLC5960 Vg voltage

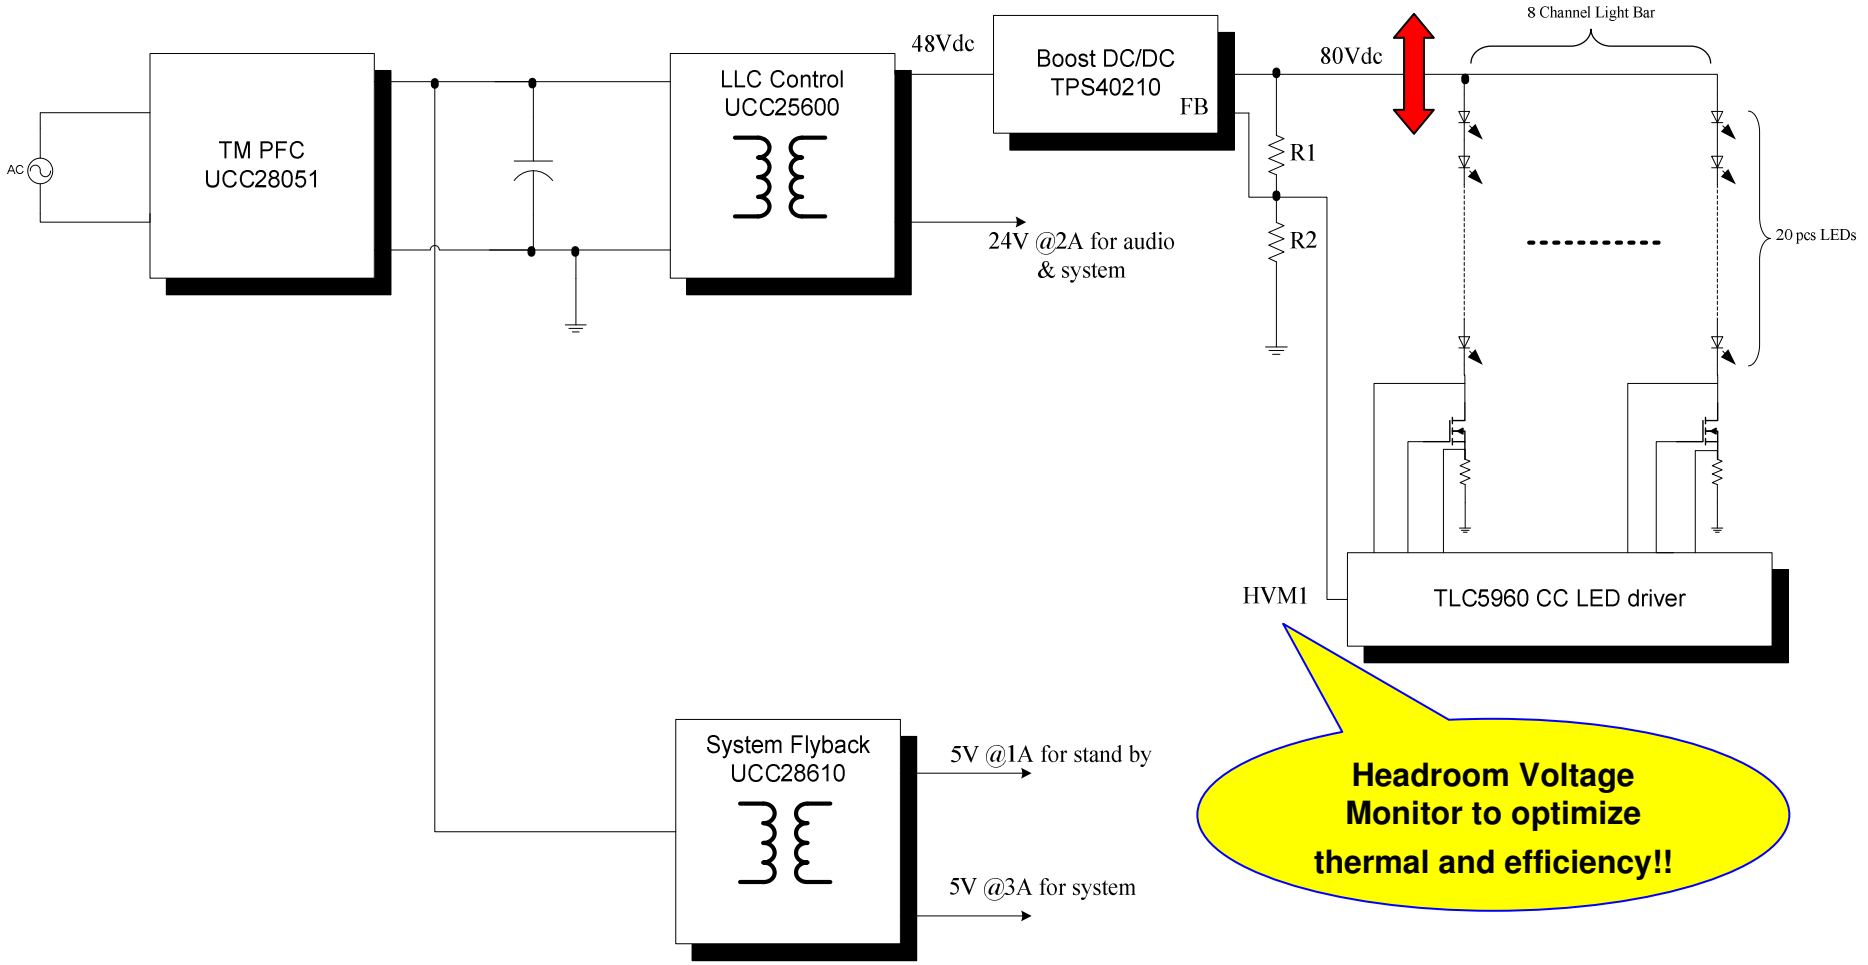
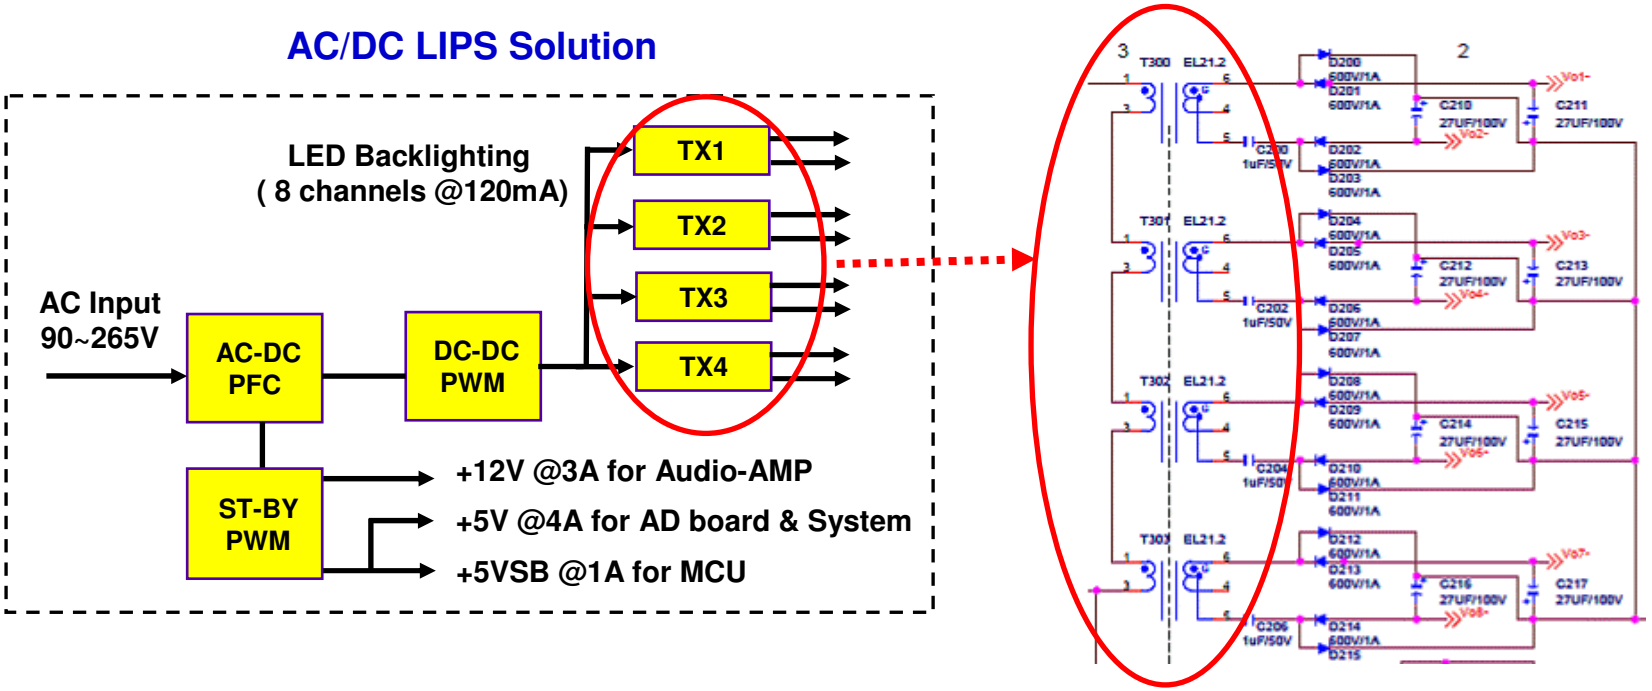
PMP4298:150W slim LIPS Demo reference design (Edge Type #1)

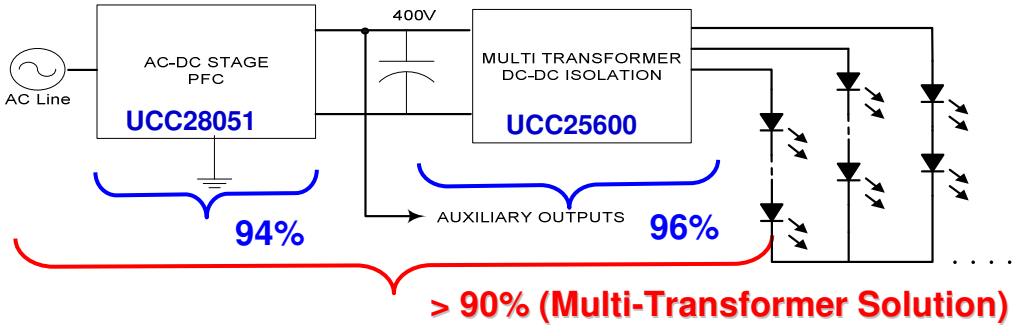


PMP4298: Project specs. for LED BLU TV LIPS

1. Input: 150W Universal AC input power supply (85-265VAC, 47-63 Hz)
2. >85% efficiency from AC to LED backlight at 220VAC input
3. Power Output:
   - LED strings: 8 channel x80V with 20pcs 120mA LED per string
   - Audio and system: 24V@2A
   - System: 5V@3A
   - Standby power: 5V@1A
4. Minimum 20ms hold up time when input line shunt off
5. Input standby power < 300mW with 5V/30mA output (On board switch to trigger standby mode)
6. PCB board specs Single Layer PCB X-Y dimensions (max) - 10"x10" Height (max) - 10mm
7. Dimming range- 1-100% (250KHz dimming frequency)
8. LED current matching spec - <3% for full dimming range
9. Flyback stage output regulation tolerance- <+/-5% over load
10. LED Protection (short, open, over current, under current, under voltage etc.)
11. TLC5960 Headroom Voltage Monitor (HVM) to optimize the efficiency and thermal

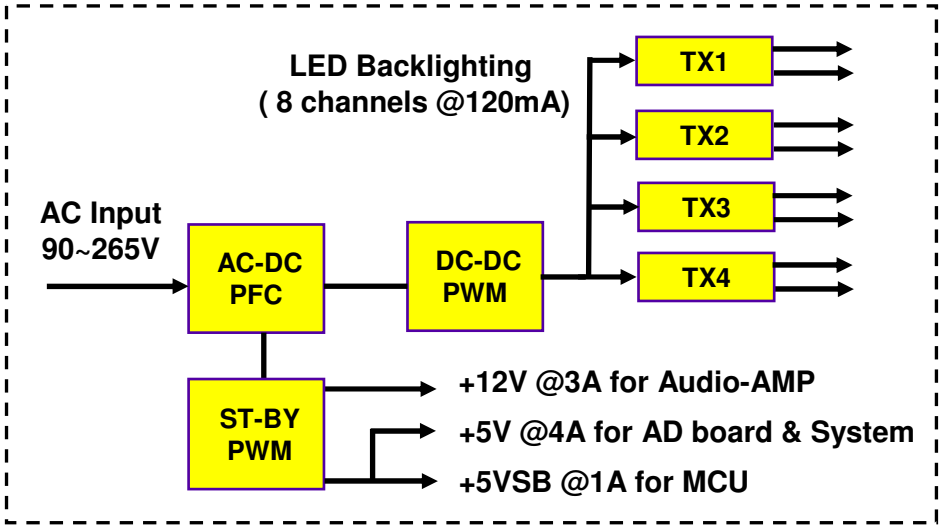
Multi-Transformer LED Backlight LIPS for DTV (Edge Type #2)

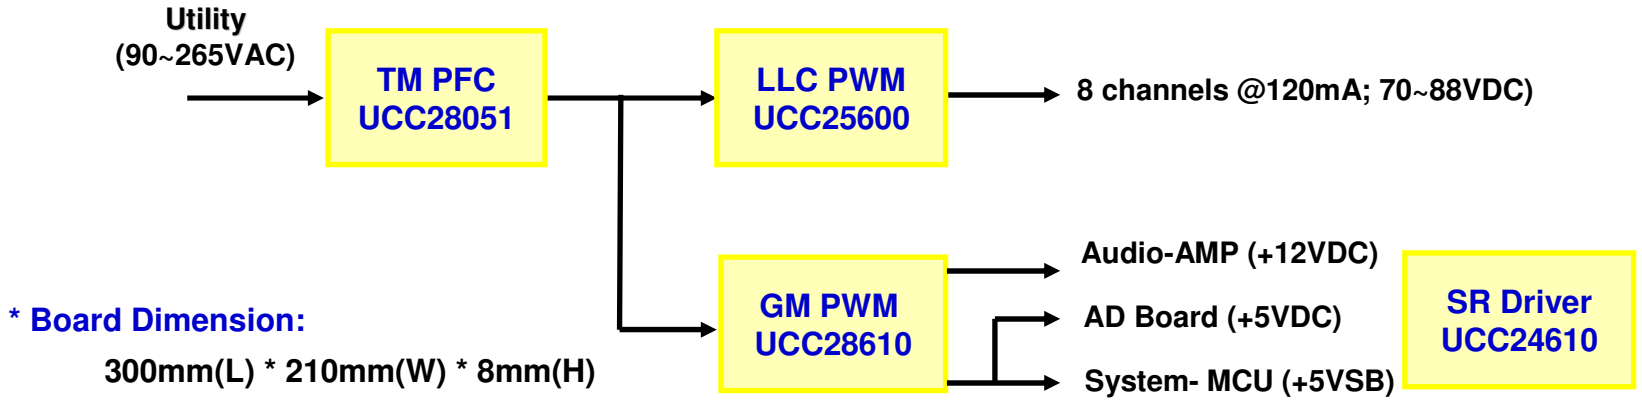




150W Slim LED-TV Power Reference Design

AC/DC LIPS Solution

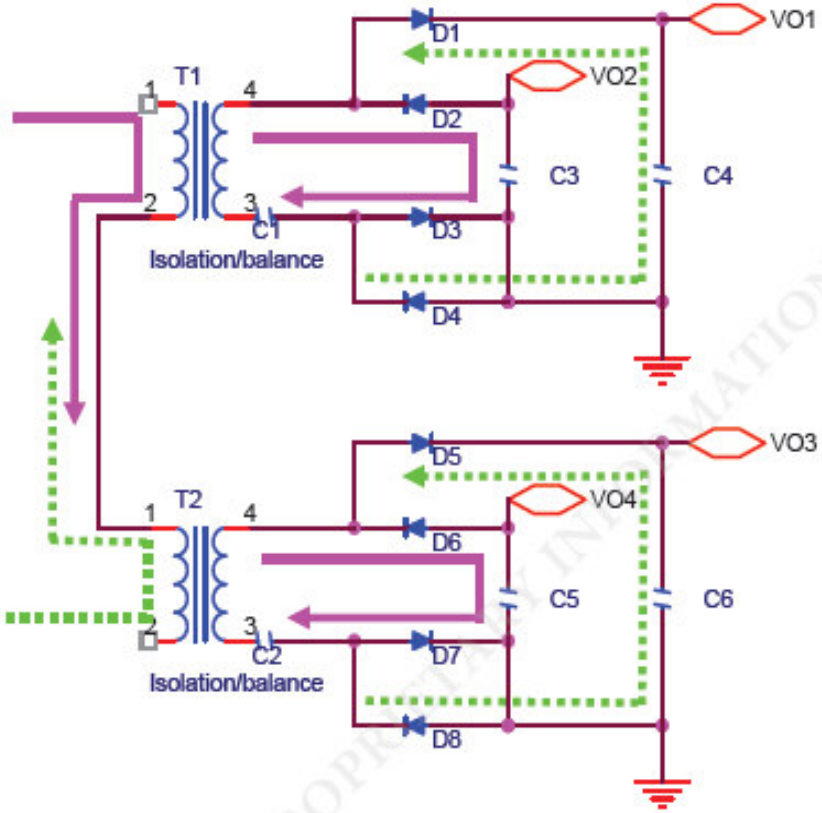


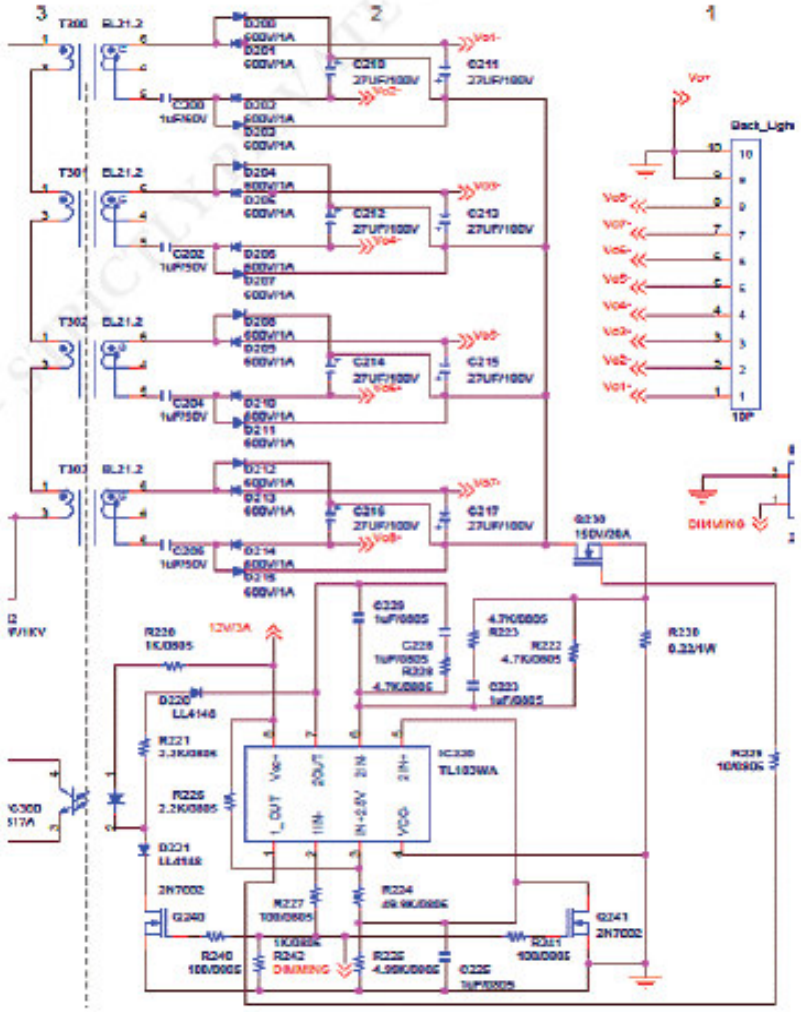


*** Board Dimension:**

300mm(L) * 210mm(W) * 8mm(H)

Multi-Transformer Architecture (*TI Patented*)





TI Supports

TI LED Lighting Solutions

Applications
Light Bulb Replacement
Automotive Lighting
Street Lighting
